Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

Two additional waste codes have been added to the permit as a result of a variation by the operator. Table S2.2 has been updated to include 19 13 02 and Table S2.4 has been updated to include 19 13 01*.

We have also corrected some errors in the previous version of the permit during the variation. The condition relating to hazardous waste storage and treatment has been renumbered, as the previous numbering was a duplication of another permit condition. References to the Waste Treatment Facility (WTF) and Multipurpose Waste Treatments and Remediation Pad (MWTRP) have been corrected in line with the acronyms used in the introductory note. Listed activities in Table S1.1 have been formatted so they are correctly described in line with the Environmental Permitting Regulations.

A varied and consolidated permit has been issued.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
