

Environment Policy

Statement

At ENGIE we recognise that as a result of our daily activities we may negatively impact upon the environments in which we work. We are committed to preventing pollution and reducing our environmental impacts wherever possible.

Our Approach

We work to the international standard of BS EN ISO 14001 to govern our approach to identifying and reducing our environmental impacts across the scope of our activities where we have operational control. We seek to work with relevant interested parties to make necessary improvements where this is possible.

Leadership Commitments

At top management level we are fully committed to improving our environmental performance across all of our business activities, specifically:

- Protecting the environment and preventing pollution wherever possible from our activities.
- Identifying risks and opportunities.
- Taking accountability for the effectiveness of our Environmental Management System.
- Providing the necessary resources to achieve our commitments.

Our Objectives

As part of our annual review of our environmental management system we will identify and set objectives as part of our environmental plan, to ensure that our key risks are mitigated and managed and that improvements can be implemented.

This plan will be documented for employees to see, made available to all requesting parties and signed off by the SHEQ Director.

As a minimum, our objectives will include:

- Identifying and complying with all standards and obligations associated with the environmental aspects from our activities.
- Identifying our significant environmental risks.
- Reducing emissions of greenhouse gases, water consumption, and waste generated and sent to landfill as part of the ENGIE Corporate Responsibility Strategy.
- Reviewing our policy statement and management system annually.
- Communicating with all relevant interested parties on our commitments and environmental management system.
- Aligning with the requirements of the ENGIE environmental and societal responsibility policy.
