

Schedule 5 - Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part B - to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	The process was operating normally with no plant failures. There were no engineering delays that could have attributed to the emissions. There was a 5 minute trimming delay during the melts which occurred between 00.59-01.59, 10.59-11.59 and 13.59-14.59. This meant the furnace was open for a short period before power was applied to melt the scrap. From 12.59-13.59, a large bang was heard from inside the Electric Arc Furnace. As a result, the Electric Arc Furnace was turned off to investigate. This may have resulted in a short brief period of incomplete combustion, which may have caused CO peak between 12.59-13.59.
Measures taken, or intended to be taken, to prevent a recurrence of the incident	As above.
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	As above.
