Part B - to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	The addition of an electrode occurred with each electrode change taking approximately 5 minutes. The emissions are drawn up to the roof canopy extraction system, reducing the potential of complete combustion. The emissions then travel to the dedusting plant. High carbon levels were recorded in the melts, this required treatment by addition of oxygen to reduce the carbon levels. There were trimming delays on two occasions which meant the furnace was open for a short period before power was applied to melt the scrap. High phosphorus levels were recorded in one of the melts, this required treatment by addition of oxygen to reduce the carbon levels.
Measures taken, or intended to be taken, to prevent a recurrence of the incident	As above.
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	As above.
