Part B - to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	During the investigation into the CO and particulates concentrations recorded, it has been identified that water leaks in the T1 and T2 ducting within the quench tower are preventing complete combustion. This results in higher than normal off gas emissions. Temporary maintenance and patch repairs of the ducting will be undertaken on a weekly basis during planned shutdowns. During the annual two week maintenance shutdown in May, the ducting panels are to be replaced.
Measures taken, or intended to be taken, to prevent a recurrence of the incident	As above.
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	As above.
