Date 4th April 2018

Dear Mr Ashcroft,

The Environmental Permitting (England and Wales) Regulations 2016
Appeal by: Hazrem Environmental Limited
Site: Nine Mile Point Industrial estate, Cwmfelinfach, Caerphilly, NP11 7HZ

Thank you for your email from 28 February and your subsequent response from 27 March 2018 in relation to the Inspectors decision issued on 14 December 2017.

Having reviewed the situation the Inspector is in agreement that his decision wrongly refers to emission concentration values in $\mu\text{g}/\text{m}^3$, whereas they should be referenced in mg/m^3 . References to an emission limit value of $80 \mu\text{g}/\text{m}^3$ are a typographical error and should read $80 \text{mg}/\text{m}^3$. We apologise for this error and any confusion caused.

Since the Inspectors decision expressly directs that a permit is granted in terms of that proposed by Natural Resources Wales (NRW) during the course of the appeal, we do not consider that the typographical error compromises the effect of the decision. As it is NRW's responsibility to ensure that the correct values are given in the permit, we do not consider that any further action is required.

Yours sincerely

G Harvey
