

REPORTING OF ENERGY CONSUMPTION

Reporting Period (Year).....2021.....

Operator: **Dunbia (UK)**
Permit Number: **BU8002**
Location: **Crosshands**

FORM E1
2 JULY 2004
ENERGY
PAGE 1 OF 1

Energy Source	Annual Energy Consumption
	Energy Used (MWh)
Electricity	11687.2
Natural Gas	6244.1

Comments:

There has been a decrease in Electricity usage in comparison to last year due to the decrease in production tonnage. The site target for Electricity usage was set at 340kWh for Q1 and Q4, rising to 350 and 360kWh during Q2 and Q3. The average for the year was 343kWh. The usual peaks and troughs were identified (and which is why the target was adjusted accordingly throughout the year), as during the Summer months, electricity increases through the refrigeration and is lower during the Winter months. Alongside projects that have run throughout the year, the site has been working to reduce this usage. Projects such as LED lighting and line shut down audits continued.

The Gas usage has decreased since last year, mainly due to the decrease in Cooked product being produced. The target set was set at 230kWh during Q1, reduced to 200kWh in Q2 and 170 in Q3, increasing to 200kWh in Q4. The target was adjusted accordingly following monthly reviews of the KPIs, in line with foreseeable tonnage and based on building heating (building heating turned on in the colder months of the year). The average for the year was 182kWh.
