Comments: The water target is based on total site water usage. For 2021 we lowered the target to 2.7m³/Tonne (set at 2.8m³/Tonne in 2019), in which we achieved this for 22 weeks of the year with an average of 2.7m³/Tonne.

We will continue to run various projects and review results through 2022. Our 2022 target is currently set at 2.7m³ based on expected tonnage for Q1 and will be reviewed quarterly.

Total volume of water used in 2021 was lower than 2020 due to a reduced production.
