Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This is an Natural Resources Wales initiated variation to remove the requirements of the Waste Treatment BAT Reference Document BAT Conclusions from the permit. This includes:

- Removal of any improvement conditions relating to Waste Treatment BAT compliance
- Removal of 'generation of wastewater' monitoring and reporting requirement
- Removal of 'generation of residues' monitoring and reporting requirement

This NRW-initiated variation has been completed to ensure consistency across the Food, Drink and Milk sector. Since the initial permit issue there has been a change in NRW position relating to implementation of the Waste Treatment BAT Conclusions for particular listed waste activities at sites within this sector. As per the NRW position we will not be assessing compliance with Waste Treatment BAT Conclusions for the listed waste activities that fall in the following categories:

- Are effluent treatment plants that solely treat the process effluent from the Food, Drink and Milk activity
- Do not include Anaerobic Digestion
- Do not process waste from other process streams

We will not be assessing compliance with Waste Treatment BAT Conclusions as we consider BAT for these waste activities to be sufficiently addressed within the Food, Drink and Milk Industries BAT Conclusions.

The effluent treatment plant for this site falls within the above category, therefore we will not be assessing compliance with the Waste Treatment BAT Conclusions and the permit is updated to reflect this change of position.

The registered office address of the Operator has also been updated since it has been changed since permit issue. An error has been amended in Table S3.2 in the permit and 'biological oxygen demand has been changed to 'biochemical oxygen demand.'

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
