**Attachments:** Heritage and Nature Conservation Information for Waste Sites.pdf; PPN-00011 Screening Report.pdf

Dear Mr.Downing,

Pre-Application Heritage and Nature Conservation Screening Request

**Pre-application permit number: PPN-00011**

**Customer: Mr Paul Downing**

**Site: Tremains Road, Bridgend CF31 1TZ (National Grid Reference: SS 91036 79681)**

Thank you for your request for a pre-application Heritage and Nature Conservation screening report for the above site. The results are enclosed.

I am also enclosing some information about how to assess the risks to any protected features near to your site prior to making an application for an environmental permit.

You must check the standard rules sets for the activities you are applying for, to satisfy yourself that you can meet the specific location criteria contained within each rule set. There are Tier 2 bespoke permit options for a limited range of standard rules sets, which can be used when a site cannot meet the location criteria of the rule set. These can be found in our charging scheme <http://naturalresources.wales/media/3557/environmental-permitting-charge-scheme-guidance-2015-16.pdf>. Please note, to qualify for a standard rule set or associated Tier 2 bespoke permit, you must be able to meet all other criteria in the rule set e.g. waste types/quantities, activities etc. Where a site cannot meet the location criteria and a Tier 2 bespoke option is not available, you need to apply for a Tier 3 bespoke permit.

In all cases, please speak to your local area office to obtain pre-application advice. If you do not yet have an officer's name to contact, please ring our Customer Care Centre on 0300 065 3000 for assistance. Please use the pre-application permit number (PPN) above when you communicate with us about this site and when you apply for a permit.

If you have any queries about the results of this screening, please contact me using my details below.

Kind regards,

**Luke Burton**
