Dear Mr Price

Compliance Assessment Report

- the Environmental Permitting (England and Wales) Regulations 2007 (RP3433UF)

When we visited your farm on *the 23rd of June 2009* we noted that there was an area of non-compliance in relation to the above regulations that apply to your farm. I list them below together with the actions you need to take.

1. Breach of Condition 2.5

As part of your Improvement programme you were required by the 31st of January 2009 to submit a written plan to the Agency following a review of all site drainage at the installation, and also a separate written plan following a review of existing poultry housing and management practices at the installation.

In order to avoid future breaches could you please complete the required information and submit it to me at your earliest convenience. I have included the relevant forms and guidance notes in order for you to complete the Drainage and Housing review.

2.. Breach of condition 2.5

You were also required as part of you permit to submit a written proposal by the 31st of January 2009 demonstrating how you would reduce the ammonia emissions from site. Although as we discussed on site last week you believe that due to the change in broiler emission factor, the site is currently under the required threshold, you need to send us a written statement demonstrating this to be the case.

In order to ensure future compliance with the regulations, could you please send me this information at your earliest convenience to the address below.

Thank you for your continued cooperation. Please contact me if you have any questions about this letter or the regulations.
