Dear Mr Price

**The Environmental Permitting (England and Wales) Regulations 2010
(RP3433UF) Compliance Assessment Report**

During my visit on 15 July 2010. I noted that there was an area of non-compliance in relation to the above regulations that apply to your farm.

Breach of Condition 2.5.1 Your site housing review as required in Table S1.3 of your permit was due on the 1 January 2009 and is still outstanding. The category 3 breach has attracted a score of 4 points. I enclose the Agency guidance on scoring of breaches and the associated potential to increase your subsistence fees. **In order to ensure your compliance with your permit could you please send me this information by 30th July 2010.**

As we discussed on site, during my inspection the new dirty water tank has still not been installed and the new concrete has not been laid.. The drainage review you submitted needs to be amended to show new tank when in position and as we discussed, needs a title and date. **Could you please send me the revised plan when the tank is installed.**

I have also enclosed the guidance from How to Comply re Best Available Technique for broiler housing as discussed.

Please contact me if you have any questions about this letter or the regulations.

Yours sincerely

NICHOLA SALTER
