Dear Gareth

**Re: POLLUTION PREVENTION AND CONTROL (ENGLAND & WALES)
REGULATIONS 2000. ASHWOOD POULTRY FARM RP3433UF**

Thank you for your time and co-operation during my visit to Ashwood Farm on 5th February 2014 to discuss your permit and carry out an inspection. I am pleased to say that you were compliant with all aspects of your permit.

The following issue which needs some attention was noted during the inspection:

The roof guttering on house number 1 had some grass growing out of it, this was not causing it to overflow at the time of the inspection but needs some maintenance in the near future.

During the inspection I noted that work had started on a building to house a biomass boiler, as discussed you will need to ensure that you vary your permit before you start operating the boiler, to reflect the new emission point from the boiler flue stack. You will also need to update your site plan. With this in mind I have enclosed some useful guidance on the permitting process for biomass boilers. If you or whoever is processing the variation on your behalf needs any further advice please contact me.

Yours sincerely

Christopher Gardener
