Dear ID & RV Williams

**POLLUTION PREVENTION AND CONTROL (ENGLAND & WALES)  
REGULATIONS 2000. TY CASTLE FARM POULTRY UNIT.**

Thank you for your time and co-operation during our visit to the above farm on 22<sup>nd</sup> May 2012 to discuss your permit and carry out an inspection. As you are aware the Environment Agency has a duty to carry out inspections of sites regulated by such permits. I am pleased to say that all aspects of the farm were compliant with the conditions in the permit.

The four yearly reviews for energy, waste, raw materials and water were all looked at and met the requirements set out in the guidance contained in the "How to comply with your environmental permit" document.

During the inspection the following issues were identified :

**1.1 General Management**

- In future the Pollution Inventory does not need to have the weights of fallen stock recorded in the waste transfer details section.

**1.2 Accident Management plan**

- The elements of this were seen in different folders, but would be better placed in one folder which is in a place on the site which is readily accessible to all workers

**2.2 Site Plan**

- This has been amended to reflect the changes to the drainage system caused by the installation of the heat exchanger

**2.3.3 Manure management**

- Although all manure is exported off site an analysis of the manure for nutrient levels should be provided to the receiving farm.

**3.3 Slurry and Washwater Management**

- The slurry pit needs clearing out following the current period of dry weather

INVESTOR IN PEOPLE

I have enclosed a copy of the variation notice for increased bird numbers and a checklist against which you can review your accident management plan

Thank you again for your time. If you require any further information regarding this letter or anything we discussed during my visit then please do not hesitate to contact me on the number below.

Yours sincerely

**CHRISTOPHER GARDENER**
