Subject: RE: Environmental Permit No.EPR/YP3138TY PORTFIELD POULTRY FARM

Dear Julian ,

Thankyou for informing me of the change in the infrastructure ,relating to the installation of two heat exchangers at Portfield Poultry Farm and the arrangements for the collection of condensate, I will update the farm file accordingly. Recent advice I received at an Environment Agency national poultry meeting indicates that the collection of condensate constitutes a change in point source emissions which at some stage needs to be reflected in the permit .This can be done the next time you need to vary the permit for other reasons.

In due course please can you send me a copy of the updated drainage plan so that I can update the farm file

Regards Chris Gardener

Dear Mr. Gardener

We are writing to inform you that two Heat Exchangers have been installed at the above farm.

The condensate will be collected and we will update the site drainage plan.

With regards

Julian Williams
