Compliance inspection report for Lower Pant Farm RP3833UR

Dear Mr Morgan

Thank you for taking part in the site inspection on the 5th of March and I am pleased to let you know that the activities we inspected are fully compliant with the following regulations:

- **Pollution Prevention and Control Regulations (PPC) 2000**

As discussed on site, there are a few issues which need some attention:

Oil tank bunding

Following the visit I would like to confirm that your permit has an improvement condition (IC1) which requires you to bund agricultural fuel storage. Having visited the site I can confirm that you have two tanks, however only one of these is within the installation. The tank located in the barn is not covered by the PPC Regulations and is dated prior to 1991 and therefore is exempt from the SSAFO regulations - as a result, this tank doesn't require bunding. However, the tank located at the western end of the poultry housing is covered by the permit and will need bunding as we noted on site. Please call me if you need any advice on this.

Drainage

The drainage on site already meets the conditions set out in the permit, as the roof extracted houses already treat the water discharged through the French drains on either side. The side extracted sheds do not need to have their roof water treated, and therefore no further work is needed on the drainage for any of the houses.

Contd...

Once again, thank you for the time spent during the visit, please contact me if you have any questions about this letter or the regulations.

Yours sincerely

GERAINT RICHARDS
