A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

Operator Monitoring Assessment - emissions to air.

Please see the attached OMA report for emissions to water for full details of the audit and assessment.

The operator was able to demonstrate a high level of compliance with the required standards for monitoring emissions to air and periodic monitoring techniques meet the requirements of the permit. It is recommended that the 5-yearly contractor audits are incorporated into a schedule in a way that ensures they are carried out at the recommended frequency.

The overall scores for the site are of a high standard.

Other than the provision of advice and guidance, at present we do not intend to take further enforcement action in respect of the non-compliance identified above. This does not preclude us from taking enforcement action if further relevant information comes to light or advice isn't followed.
