Dear Mr. Nugent

**POLLUTION PREVENTION AND CONTROL (ENGLAND & WALES)
REGULATIONS 2000. PERRY ORCHARD FARM POULTRY UNIT - Permit No.
GP3936MK**

Thank you for your time and co-operation during our visit to the above farm on 8th June 2012 to discuss your permit and carry out an inspection. As you are aware the Environment Agency has a duty to carry out inspections of sites regulated by such permits. I am pleased to say that all aspects of the farm were compliant with the conditions in the permit.

The four yearly reviews for energy, waste, raw materials and water were all looked at and met the requirements set out in the guidance contained in the "How to comply with your environmental permit" document

During the inspection of the following issues were identified :

3.3.1 Fugitive Emissions

There were cracks in the concrete in front of houses 1 and 2 which were highlighted in a previous inspection , while these were sealed with a bitumen type material, this showed signs of shrinkage and plans for the permanent repair of the concrete needs to be put in place and a date for completion determined .Please can you reply to this letter with a date when you expect to have completed the work .

3.3.2 Fugitive emissions

There was a small open sided shed storing plastic containers of chemicals , if this continues to be used for this purpose then given its proximity to the River Trothy

some form of secondary containment needs to be put in place .

I have located the variation of your permit to increase the number of bird places and enclose a copy for your files .

Thank you again for your time. If you require any further information regarding this letter or anything we discussed during my visit then please do not hesitate to contact me on the number below.

Yours sincerely

CHRISTOPHER GARDENER
