## **Schedule**

Further information is required in relation to your Application.

1. In respect of the AAD operations on-site and in light of BAT19 of the Waste Treatment Bref, please provide a full risk assessment of all secondary containment measures on-site. The risk assessment and measures should be produced in-line with the recognised AD industry standard developed in-line with the CIRIA 736 guidelines. Link to the guidelines and risk assessment tool below;

<http://adbioresources.org/library/secondary-containment-tool-and-guide>

2. With regards to the Site Condition Report (SCR), the application states that the gas to grid SCR (2014) is still relevant, the site plan in that SCR is different to the site plan submitted for this permit variation. Please confirm if the new land to be added as part of this variation is included in the SCR where baseline has been set, if not an updated SCR needs to be submitted to include the land to be added to the permit.
