Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This variation adds a standard rules SR2008No21_75kte to the existing permit and allows the operator to operate a Metal Recycling Site. These rules will permit the sorting, separation, grading, shearing, shredding, baling, compacting, crushing, granulating and cutting of ferrous metals or alloys and non-ferrous metals for recovery. The total quantity of waste that can be accepted at a site under these rules must be less than 75,000 tonnes a year.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
