

APPENDIX F : Handling Cement Asbestos Waste

PROCEDURES FOR HANDLING DEPOSIT OF BONDED ASBESTOS

- All bonded asbestos sheets will be stored inside the transfer station building in a lockable enclosed steel skip
- Transfer of bonded asbestos sheets will be carried out with particular care to ensure that no fibres are released.
- Personnel handling the asbestos sheets will be equipped with the appropriate protective equipment which must be worn at all times during all handling procedures
- In the event of any bonded asbestos sheets being broken into small pieces (-under-600mm in any-one direction), the pieces must be double bagged.
- Double bagging will consist the pieces being carefully placed in RED plastic bag which will then be sealed.
- The RED bag will then be placed in a transparent bag which will also be sealed. This outer bag will be sealed to produce a "balloon "effect.
- The double bagged asbestos will then be placed carefully inside the lockable enclosed steel container
