## Permit number EPR/BV8016ID

### Introductory note

**This introductory note does not form a part of the notice.**

The following notice gives notice of the variation and consolidation of an environmental permit.

This normal variation is for the inclusion of 2 new emission points to air on the main process roof (A30 and A31) for dust abatement. A wet dust abatement system to replace the 'Bran Flakes Bleed Dryer D4686', with its own new emission point (A30), has been included. Three emission points from existing cyclones on the process (numbered 33, 34 and 37) now link into a dry dust cartridge abatement system, with a single emission point (A31) in the environmental permit, by way of this variation.

These changes have been consolidated into the permit.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit		
Description	Date	Comments
Application received	08/03/05	
Schedule 4 Notice	Request dated 08/09/05	Response dated 10/10/05
Request to extend determination	18/07/05	Request accepted 22/07/05
