PERMIT ADMINISTRATIVE VARIATION
(PERMIT REF: EPR/EP3698FL)

Dear Sir or Madam,

I write as the agent on behalf of Cwm Environmental Ltd, (the applicant) to make the formal application for the administrative variation to the Permit as follows:

We have been advised that the administrative variation is required to bring the Permit into line as an 'Installation' Permit under the IED Regulations. Because the Permit was only recently updated (2012) this should be a simple variation and there will be no fee required for this.

I enclose the two relevant documents in this regard.

PLEASE NOTE: I have also emailed the information to you and these hard copies are from the documents emailed earlier today. (Also note that on the electronic form, the field to be populated with the declaration would not accept typed text (unless the box regarding Standard Facility rules part was ticked) and therefore the declaration details have been inserted in the 'additional names' section).

Please contact me if you require any further information

Many thanks.

D J Baldwin.
