Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This variation and consolidation is to change the quantities of waste that can be accepted at the site and to modernise the permit to current standard conditions.

The maximum quantity of End-of-life vehicles (ELV) increases from 2,500 to 7,499 tonnes per annum; and the maximum quantity of non-hazardous waste decreases from 65,000 to 53,249 tonnes per annum.

Additional waste codes to allow the acceptance of Waste Electrical and Electronic Equipment (WEEE) are also included in the varied permit.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
