

AJT Recycling Ltd Covering Letter 16th December 2016

AJT Recycling Ltd (AJT) initially operated a bespoke permit for a mixed metal recycling site since December 2011. The waste management activities include the depollution and dismantling of end of life vehicles, and the storage, sorting and manual treatment of scrap metals. This is under Permit number EPR/BB373RS.

AJT employs approximately 16 people at its site at Plot P1 Felinfach, Swansea.

Since the major reduction of scrap metals prices, there has been a dramatic reduction in materials being received at the site which is compromising the sustainability of the operation.

To mitigate this and avoid redundancies, AJT varied its bespoke permit to operate two Standard Rules permits from the site, notably SR 2008 No.3 and SR 2012 No.14. This was duly granted in March 2016.

Since that date, AJT has been awarded several contracts for the depollution and destruction of Vehicles, this has meant the 5000t limit under SR 2012 No.14 may not be complied with. After discussions with NRW, to mitigate this, AJT now proposes to vary **SR 2012 No 14** to **SR 2008 No. 20**, thereby ensuring future compliance ELV depollution limits.

A new site plan has been provided to define the permitted areas (Ref DWG No 161-01-01-16.DO3)
