

Notice of variation with introductory note

Environmental Permitting (England & Wales) Regulations 2010

Derwen Plant Company Limited

Derwen Plant Company Limited
Neath Abbey Wharf
Neath Abbey
West Glam
SA10 6BL

Variation application number
EPR/GB3831AM/V002

Permit number
EPR/GB3831AM

Derwen Plant Company Limited

Permit number EPR/GB3831AM

Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This is a Natural Resources Wales initiated variation to amend the *Limits of activities* section of Table S1.1 and the introductory note because of discrepancies between the draft version of the original permit and the final issued permit.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit		
Description	Date	Comments
Permit determined EPR/GB3831AM/A001	20/06/12	Permit for waste treatment facility for the treatment of waste to produce soil, soil substitutes and aggregates issued to Derwen Plant Company Limited.
Variation issued EPR/GB3831AM/V002	05/06/14	Regulator led variation to amend storage and infrastructure requirements.

End of introductory note

Notice of variation

Environmental Permitting (England and Wales) Regulations 2010

The Natural Resources Body for Wales ("Natural Resources Wales") in exercise of its powers under regulation 20 of the Environmental Permitting (England and Wales) Regulations 2010 varies

Permit number
EPR/GB3831AM

issued to:
Derwen Plant Company Limited ("the operator")

whose registered office is

Neath Abbey Wharf
Neath Abbey
Neath
West Glam
SA10 6BL

company registration number 03104740

to operate a regulated facility at

Derwen Plant Company Limited
Neath Abbey Wharf
Neath Abbey
Neath
West Glam
SA10 6BL

to the extent set out in the schedules.

The notice shall take effect from 03/06/14.

Schedule 1 – conditions to be deleted

None

Schedule 2 – conditions to be amended

The following conditions are amended as detailed, following an NRW initiated variation:

Introductory note

This introductory note does not form a part of the permit

The main features of the permit are as follows.

This permit allows the storage of waste and the treatment of waste by sorting, separation, screening, crushing, blending and washing to produce soil, soil substitutes and aggregate.

Permitted wastes do not include hazardous wastes. The annual throughput of the site must not exceed 300,000 tonnes per year.

All non-hazardous waste must be stored and treated on an on impermeable surface with sealed drainage. All inert waste must be stored and treated upon hard standing or an impermeable surface with sealed drainage.

This permit does not permit the burning of any wastes, either in the open, inside buildings or in any form of incinerator.

The wash plant is a closed loop system any additional water required for the plant will come from on-site storage (lagoon, silt traps or rainwater storage tanks), mains water or off-site source (tankered into site).

This permit does not allow any emission into surface waters or groundwater except:

- clean water from roofs and parts of the site not used for waste activities including storage of wastes, and
- rainfall dependant run off from areas of the site used in connection with the storage and/ or treatment of waste provided that the water passes through two silt traps and a storage lagoon prior to entering the water course via an invert.

Table S1.1 activities		
	Description of activities for waste operations	Limits of activities
A1 Waste treatment facility for the production of soil, soil substitutes and aggregates	R13: Storage of waste pending any of the operations numbered R1 to R12 (excluding temporary storage, pending collection, on the site where it is produced)	All non-hazardous waste must be stored and treated on an impermeable surface with sealed drainage.
	R3: Recycling/reclamation of organic substances which are not used as solvents	All inert waste must be stored and treated upon hard standing or an impermeable surface with sealed drainage.
	R5: Recycling/reclamation of other inorganic compounds	<p>Treatment consisting only of:</p> <ul style="list-style-type: none"> - Sorting - separation - screening - crushing - blending - washing <p>of waste for recovery as soil, soil substitute or aggregate only.</p> <p>Waste types as specified in Table S2.1</p> <p>Notwithstanding the waste types permitted in table S2.1 wastes which have any of the following characteristics shall not be accepted;</p> <ul style="list-style-type: none"> - hazardous wastes - contaminated wastes - wastes consisting solely or mainly of dusts or powders - wastes which are odour producing or likely to be odorous

Schedule 3 – conditions to be added

None
