

OUTGOING

PERMIT

ALYN AND DEESIDE DISTRICT COUNCIL

ENVIRONMENTAL PROTECTION ACT 1990

PART II

WASTE MANAGEMENT LICENCE No. 197/95

THE Alyn and Deeside District Council, acting as a Waste Regulation Authority in pursuance of Section 30(1)(f) of the Environmental Protection Act 1990,
HEREBY GRANT a Waste Management Licence, pursuant to an application dated 22nd December 1994, in respect of the following:-

FULL NAME AND ADDRESS OF LICENCE HOLDER

AD Waste Limited, 3 Hilliards Court, Chester Business Park, Wrexham Road, Chester.
CH4 9QX

LOCATION OF SITE TO WHICH THIS LICENCE RELATES

Globe Way Civic Amenity Site, Globe Way, Buckley, Deeside, Clwyd.
NGR SJ 288 649.

WASTE MANAGEMENT ACTIVITIES AUTHORISED BY THIS LICENCE

The keeping of waste for the purpose of recycling.
The keeping of waste for any purpose other than recycling.

TYPES AND QUANTITIES OF WASTE PERMITTED TO BE ACCEPTED AT THE SITE

See Appendix 2 of the attached conditions

ANNUAL LIMIT OF WASTES TO BE ACCEPTED AT THE SITE

4 999 tonnes.

This Waste Management Licence is granted subject to the attached conditions (24 pages).

Dated 17th day of March 1995.

Signed.....

Chief Technical Services Officer

THE LICENCE HOLDER SHOULD READ CAREFULLY THE NOTES OVERLEAF

NOTES

1. INTRODUCTION

These notes are intended to guide the licence holder to the Sections of the Environmental Protection Act 1990 (hereinafter referred to as "the 1990 Act") which may be relevant to him in that capacity. The licence holder is strongly advised to obtain a copy of the 1990 Act and a copy of the Waste Management Licensing Regulations 1994 (S.I. 1994 No. 1036) (hereinafter referred to as "the 1994 Regulations"). Both are published by HMSO.

2. OFFENCES

Section 33(1) of the 1990 Act provides that a person shall not deposit controlled waste, or knowingly cause or knowingly permit controlled waste to be deposited in or on any land unless a waste management licence is in force and the deposit is in accordance with the licence; keep, treat or dispose of controlled waste, or knowingly cause or knowingly permit controlled waste to be treated, kept or disposed of in or on any land, or by means of any mobile plant, except under and in accordance with a waste management licence; treat, keep or dispose of controlled waste in a manner likely to cause pollution of the environment or harm to human health. Section 33(6) of the 1990 Act provides that a person who contravenes subsection (1) above or any condition of a waste management licence commits an offence. Other offences are also created by Section 34 of the 1990 Act - the Duty of Care. For further details of the application of these offences, including statutory defences and penalties, refer to Sections 33 and 34 of the 1990 Act.

3. VARIATION OF LICENCES

Section 37 of the 1990 Act provides that the conditions of a waste management licence may be modified, either on the initiative of the waste regulation authority or upon application by the licence holder (if accompanied by the appropriate fee).

4. REVOCATION AND SUSPENSION OF LICENCES

Section 38 of the 1990 Act provides that, in specific circumstances, the waste regulation authority may partially or entirely revoke the licence or suspend the licence so far as it authorises the carrying on of the activities specified within the licence or such of them as the authority specifies in suspending the licence. For further details refer to Section 38 of the 1990 Act.

5. SURRENDER OF LICENCES

Section 39 of the 1990 Act provides that a licence may be surrendered to the issuing authority but, in the case of a site licence, only if the authority accepts the surrender. To surrender your licence you must apply to the authority giving the required fee and the information and evidence required by Regulation 2(2), (3) and (4) of the 1994 Regulations. If the authority is satisfied that the condition of the land is unlikely to cause pollution of the environment or harm to human health (so far as that condition is the result of the use of the land for the treatment, keeping or disposal of waste) and the National Rivers Authority have no objections then the authority shall accept the surrender and issue a certificate of completion. For further details refer to Section 39 of the 1990 Act and Regulation 2 and Schedule 1 of the 1994 Regulations.

6. TRANSFER OF LICENCES

Section 40 of the 1990 Act provides that a licence may be transferred to another person. To transfer your licence you and the proposed transferee must jointly apply to the issuing authority giving the required fee and the information required by Regulation 2(5) of the 1994 Regulations. If upon the application the authority is satisfied that the proposed transferee is a fit and proper person (see Section 74 of the 1990 Act) then the authority shall effect a transfer of the licence to the transferee. For further details refer to Section 40 of the 1990 Act and Regulation 2(5) and Schedule 2 of the 1994 Regulations.

7. FEES AND CHARGES FOR LICENCES

You will already have paid an application fee for this waste management licence. Section 41 of the 1990 Act provides that an annual subsistence charge is payable for holding the licence and that a fee is payable upon every application to modify the conditions of, surrender or transfer the licence. A charge is also payable if the National Rivers Authority ever have to be consulted because of the likely pollution of water by the licensed activities. A scheme of fees and charges is published by the Welsh Office and for details of the current scheme you may contact the waste regulation authority. For further detail refer to Section 41 of the 1990 Act.

8. SUPERVISION OF LICENSED ACTIVITIES

Section 42 of the 1990 Act provides that the waste regulation authority has a duty to take the steps needed to ensure that the activities authorised by the licence do not cause pollution of the environment or harm to human health or become seriously detrimental to the amenities of the locality affected by the activities and to ensure that the conditions of the licence are being complied with. If it appears to the authority that pollution of water is likely to be caused then it shall consult the National Rivers Authority which will result in a charge to the licence holder. The authority may, in the case of an emergency, carry out work on the land or in relation to plant or equipment on the land to which the licence relates and may recover the costs of such works from the licence holder. If a condition or conditions of the licence are not being complied with then the authority may require the licence holder to comply with the condition(s) within a specified time and if the condition(s) are not then complied with the authority may revoke or suspend the licence (see 4 above).

For further details refer to Section 42 of the 1990 Act.

9. APPEALS TO THE SECRETARY OF STATE FROM DECISIONS WITH RESPECT TO LICENCES

Section 43 of the 1990 Act provides that where, except in pursuance of a direction given by the Secretary of State, an application for a licence or a modification of the conditions of a licence is rejected; a licence is granted subject to conditions; the conditions of a licence are modified; a licence is suspended; a licence is revoked under Section 38 or 42 of the 1990 Act; an application to surrender the licence is rejected; or an application for the transfer of a licence is rejected then the applicant, holder, former holder or proposed transferee, as the case may be, may appeal from the decision to the Secretary of State. Regulations 6 and 7 of the 1994 Regulations provide the form of notice of appeal and what information must be included and define the time limit for making an appeal. For further details refer to Section 43 of the 1990 Act and Regulations 6 to 9 of the 1994 Regulations.

10. FALSE STATEMENTS

Section 44 of the 1990 Act provides that a person who, in an application for a licence, for a modification of the conditions of a licence or for the surrender or transfer of the licence, makes any statement which he knows to be false in a material particular or recklessly makes any statement which is false in a material particular is guilty of an offence. For further details refer to Section 44 of the 1990 Act.

APPENDICIES.

- Appendix 1. Site Location Plan (Area Covered by Licence).**
- Appendix 2. Permitted Types and Quantities of Wastes.**
- Appendix 3. Soil Classes A to E - Limits of Ranges for Contamination Levels.**

A. GENERAL CONSIDERATIONS

A1. Area Covered by the Licence.

These licence conditions shall only apply to the site shown hatched black on the plan attached at Appendix 1 (one) to this licence.

A2. Permitted Types and Quantities of Waste

a.) Permitted types of waste to be received and deposited

Only the waste types specified in Appendix 2 (two) attached to this licence shall be permitted to be deposited at the site. These materials shall not be admixed with any other non listed material.

b.) Total quantity of wastes received weekly

The total quantity of wastes accepted weekly at the site shall not exceed the quantities specified in Appendix 2 (two) attached to this licence.

c.) Annual limit

The total quantity of wastes accepted in any calendar year (1st January to the 31st December) at the site shall not exceed 4999 (four thousand nine hundred and ninety-nine) tonnes.

A3. Hours of Operation.

i.) The site shall be permitted to be open for the receipt, removal, deposit and or handling of all wastes permitted by condition A2(a) during the hours:-

Winter (1st October to 31st March)
08:00 hours to 17:00 hours daily.

Summer (1st April to 30th September)
08:00 hours to 20:00 hours daily.

The site shall be closed on Christmas Day.

No waste shall be deposited outside of these hours except in the case of an emergency and with the prior consent of the Waste Regulation Authority.

ii.) No waste shall be deposited during the hours covered by official lighting up times (as published by the Science and Engineering Research Council) unless adequate lighting of at least 50 (fifty) lux has been provided and is in use in accordance with the Working Plan. This lighting must be independent of any vehicle lighting. Any lighting provided shall be screened or directed to ensure that any neighbouring properties are not affected by the light during operational hours.

A4. Operation of the Site

The site shall be operated in accordance with the licence conditions and the agreed Working Plan. In the event of any proposals or details of operations contained in the Working Plan being in conflict with the licence conditions, the licence conditions shall prevail.

A5. Modification of Licence Conditions

Applications to modify licence conditions must be sent in writing to the Waste Regulation Authority, accompanied by the appropriate modification fee as specified in the Waste Management Licensing (Fees and Charges) Scheme 1994 (or any subsequent replacement scheme). Where appropriate the application should also include a proposed modification to the Working Plan in accordance with condition A7 of this licence.

A6. Working Plan

The Working Plan shall be as defined by Waste Management Paper Number 4 (four), 3rd Edition (HMSO, 1994), or any subsequent revision.

a.) Agreement of the Working Plan.

For the purposes of this licence the Working Plan shall consist of the latest issue or modification of the Working Plan which has been agreed in writing by the Waste Regulation Authority.

b.) Responsibility of the licence holder.

Agreement by the Waste Regulation Authority of the Working Plan shall not relieve the holder of their responsibility to ensure that any or all of the following do not occur:

- i) pollution of the environment
- ii) harm to human health and/ or
- iii) serious detriment to amenities.

A7. Modification of the Working Plan

The current issue of the Working Plan shall not be revised, altered or otherwise unless:-

- i) A copy of the proposed revision, alteration or other modification has been submitted to the Waste Regulation Authority.
- ii) The proposed revision, alteration or other modification has been agreed within two months of the date of receipt of the modified Working Plan or any other timescale agreed in writing with the Waste Regulation Authority.

A8. Display of Site Licence and Working Plan

a.) Display of site licence

A copy of this site licence including the conditions and any modification thereto shall be displayed at all times in the site office in a prominent position. All site operatives shall be fully conversant with its contents.

b.) Inspection of the Working Plan and Waste Management Licence.

The current issue of the Working Plan and the Waste Management Licence including the conditions and any modifications thereto shall be made available for inspection at the site office at any reasonable time by:-

- i) any site operative
- ii) any authorised representative of the waste Regulation Authority.

A9. Staffing

Appropriately qualified technically competent supervisory and/ or operating staff shall be made available as and when required to ensure that the conditions of this licence are fulfilled. The appropriate levels of technical competence shall be as specified in condition A12(a) of this licence.

At least one operative shall be present on the site whenever waste is being deposited or removed.

A10. Fit and Proper Person Status

a.) Technically competent management

The site shall be managed by a "technically competent person" as defined by Regulation 4 (four) of the Waste Management Licensing Regulations 1994 (S.I. 1994 No. 1056). The technically competent person (or persons) shall be the holder of a level 3 (three) (Civic Amentity Site Operations) Wastes Management Industry Training Board (WAMITAB) Certificate of Technical Competence (COTC) or a valid Provisional COTC (PCOTC) unless the technically competent manager is deemed to be technically competent under the transitional arrangements as defined by Regulation 5 (five) of the Waste Management Licensing Regulations 1994.

b) Management structure

A list of the technically competent persons and the management structure for the site shall be provided to the Waste Regulation Authority in writing. The list shall contain the following information:-

- i) Name of person
- ii) Position within the management structure
- iii) Responsibilities of the person
- iv) Business Address
- v) Telephone Number

c.) Changes to the management structure

Should any change in the management or management structure submitted in condition A12(b) of this licence occur the Waste Regulation authority shall be notified within 14 (fourteen) days of the changes.

A11. Relevant Offences

Should the licensee or any "relevant person" (as defined by Section 74(7) of the Environmental Protection Act 1990) be convicted of a "relevant offence" (as defined in Regulation 3 (three) of the Waste Management Licensing Regulations, S.I. 1994 No. 1056) the licensee shall notify the Waste Regulation Authority within 14 (fourteen) days of the conviction.

A12. Emergency Contact Details

No wastes shall be received at the site until the licence holder has provided to the Waste Regulation Authority, in writing, the name, address and telephone number of a responsible person for contact in the event of an emergency arising in connection with the facility:-

- i) during normal operating hours; and
- ii) outside normal operating hours.

Any change in these details shall be notified in writing to the Waste Regulation Authority within 24 (twenty four) hours of the change occurring.

A13. Temporary Cessation of Operations

Any temporary cessation of operations which require the transfer or diversion of waste delivered at the facility to facilities elsewhere shall be notified in writing to the Waste Regulation Authority. The posting of any such notifications shall be carried out within 48 (forty eight) hours of the diversion occurring.

A14. Recommencement of Operations

Not less than 14 days notice shall be given in writing to the Waste Regulation Authority of the date on which the acceptance of wastes is to recommence in the event of a temporary cessation for a period in excess of three months unless agreed in writing with the Waste Regulation Authority.

A15. Notification Under Licence Conditions

Any notification which the licence holder is required to make under the conditions contained within this licence shall be made to:-

Chief Technical Services Officer,
F.A.O. Waste Regulation Section,
Alyn & Deeside District Council,
Civic Offices,
Saint David's Park,
Ewloe,
Deeside,
Clwyd.
CH5 3PW.

Telephone Number : (0244) 525000

Facsimile Number : (0244) 525323

B. SITE INFRASTRUCTURE.

B1. Access to the Site.

The access to the site shall be as detailed in the Working Plan. No other points of access shall be provided.

B2. Prevention of Deposition of Mud or Wastes on the Highway.

The licence holder shall ensure that all vehicles which collect and remove wastes from the site shall leave the site in such a condition so as to prevent mud being carried out onto the public highway and to prevent wastes escaping from the vehicle.

B3. Site Security and Fencing.

The site shall be securely fenced around the perimeter of the site and lockable gates installed at the site entrance in accordance with the specification detailed in the working plan.

The site fencing and gates shall be inspected each working day and any damage or holes shall be repaired within 2 (two) working days of being detected.

Outside of the working hours detailed in condition A3 to this licence the site gates shall be locked except in the case of an emergency.

The site gates shall be locked whenever the site is not manned.

B4. Site Identification Board.

A site identification board shall be provided and displayed at a prominent position at the site entrance. The board shall be of minimum dimensions 750mm by 750mm and shall clearly display the following information:-

- i) The name and telephone number of the site.
- ii) The hours of opening of the site.
- iii) The number of the Waste Management Licence.
- iv) The name, address and telephone number of the licence holder, including an emergency contact telephone number.
- v) The name, address and telephone number of the Waste Regulation Authority who issued the Waste Management Licence.

The notice board shall be maintained at all times so that the information detailed is clearly legible.

B5. Fuel Storage Tanks and Waste Oil Tanks.

All fuel and waste oil shall be stored in designated tanks which are imperviously based and banded. The bund and base shall provide containment for at least 110% of the maximum volume of the tank. All fill and draw pipes shall be retained within the bund. The specifications of any tanks and bunds provided in accordance with this condition shall be provided to the Waste Regulation Authority for inclusion into the agreed Working Plan in accordance with condition A7 of this licence.

Any tanks provided in accordance with this condition shall be clearly labelled as to their contents.

B6. Site Surfacing.

The site surfacing shall be constructed in accordance with the agreed Working Plan. The site surfacing shall be inspected weekly and any damage or holes repaired within 2 (two) working days.

B7. Site Drainage.

A surface water drainage scheme for the site shall be provided at the site in accordance with the Working Plan.

B8. Site Office.

A site office shall be provided at the site in accordance with the agreed Working Plan. The office shall be provided with power, washing and toilet facilities and a telephone.

B9. Provision of Skips.

Skips shall be provided and located at the site in accordance with the agreed Working Plan.

B10. Vehicle Battery Storage.

All lead-acid vehicle batteries stored at the site shall be stored upright in bunded containers capable of holding 110% of the contents of the largest battery stored within the container **when** batteries are stored within the container. Batteries shall be stored within the containers on one layer only and shall not be stacked.

The containers holding the batteries shall be kept indoors within a lockable skip or other suitable lockable container.

B11. Vehicle Parking.

Space for the parking of vehicles to unload wastes into the skips shall be provided in accordance with the agreed Working Plan.

C. WASTE RECEPTION, STORAGE AND REMOVAL.

C1. Checks on Incoming Wastes.

All loads of waste received at the site shall be checked by the site operative to ensure that the waste types are acceptable for deposit at the site in accordance with the waste types permitted by condition A2(a) to this licence. The checks shall consist of the following:-

a.) Visual checks prior to deposit.

A visual check shall be made of the contents of all incoming loads of waste to ensure their suitability for deposit at the site. Any cover shall be removed from the load to ensure that the load is clearly visible. Any load of waste which cannot be clearly inspected shall not be accepted for deposit at the site.

b.) Visual checks following deposit.

All wastes deposited at the site shall be checked immediately following deposit to ensure their suitability for deposit at the site.

C2. Non-Acceptable Wastes.

a.) Turning away or removal of wastes.

All wastes not acceptable for deposit at the site in accordance with the waste types permitted by condition A2(a) to this licence shall be turned away from the site. If the non-acceptable wastes have only been identified following deposit then they shall be removed from the site within 2 (two) working days unless an alternative timescale has been agreed in writing with the Waste Regulation Authority.

b.) Storage of wastes prior to removal.

Any skip containing non-acceptable wastes shall be covered and clearly segregated from the rest of the skips at the site. The skip shall be clearly marked with the words "Do Not Use".

c.) Recording of incidents.

A record shall be kept of all such incidents and the Waste Regulation Authority informed by telephone immediately upon their occurrence.

C3. Sampling and Analysis.

Samples of any waste entering the site or undergoing disposal on the site and samples of any gaseous, liquid or particulate emissions from the site shall be taken by or under the direction of the Waste Regulation Authority as and when required by the Waste Regulation Authority.

The operator shall provide any reasonable assistance in the form of site personnel and/or equipment to officers of the Waste Regulation Authority on request to enable such samples to be obtained.

Any information required to enable sampling to be carried out in accordance with the provisions of the Control of Substances Hazardous to Health (COSHH) Regulations 1988 (S.I. 1988 No. 1657) (or any subsequent replacement legislation) shall be provided to the Waste Regulation Authority on request.

C4. Asbestos Waste.

Cemented asbestos sheets shall only be accepted at the site if they are intact and in a non-friable condition. These sheets shall be deposited, stored and removed from the site in accordance with the accepted working plan. Any skips containing asbestos shall be sheeted over, except when wastes are being deposited in it, until the asbestos has been completely covered with other wastes at which time the skip may remain unsheeted.

C5. Waste Oils.

Waste oils accepted at the site shall immediately be deposited into the bunded waste oil tank provided in accordance with condition B5 of this licence.

C6. Vehicle Batteries.

Waste lead acid vehicle batteries received at the site shall immediately be placed in a bunded container provided in accordance with condition B11 of this licence.

No more than 20 (twenty) vehicle batteries shall be stored at the site at any one time.

Should 10 (ten) or more vehicle batteries be removed from the site at any one time then their removal shall be in accordance with the Control of Pollution (Special Waste) Regulations 1980 (S.I. 1980 No. 1709) (or any subsequent replacement legislation). Any such removal shall be recorded in accordance with condition F1 of this licence.

C7. Tunnelling and Excavation Wastes.

No tunnelling or excavation wastes which are contaminated above Soil Class A on the contamination levels provided at Appendix 3 (three) to this licence shall be accepted at the site.

No tunnelling or excavation wastes which are from a source or sources where contamination may be suspected shall be accepted at the site unless accompanied by a full analysis for the parameters detailed in Appendix 3 (three) to this licence which proves that the wastes are within Soil Class A.

C8. Maximum Duration of Waste Storage.

No wastes deposited into skips shall remain at the site for longer than 48 (forty-eight) hours. All other waste items deposited at the site shall be stored for no longer than 7 (seven) consecutive days, with the exception of waste oils, textiles and paper deposited in designated receptacles for recycling purposes which may remain at the site until the wastes are ready for collection.

C9. Collection of Skips.

When skips are being delivered, emptied or collected at site the site operator shall ensure that no persons other than site operatives or the driver and personnel associated with the vehicle delivering, collecting or emptying the skips are allowed within the vicinity of the operation.

D. SITE OPERATIONS

D1. Plant and Machinery

An appropriate level of machinery, plant and equipment shall be provided to ensure that all incoming waste and surface water drainage arisings are dealt with in accordance with the conditions of this licence. All such machinery, plant and equipment shall be specified in the Working Plan and shall be maintained in working order. Operational instructions for such machinery, plant and equipment shall be kept in the site office.

Silencers shall be fitted, used and maintained on all relevant machinery, plant and equipment in accordance with the manufacturers recommendations.

In the event of any breakdown of such machinery or equipment which results in either waste or surface water arisings not being dealt with in accordance with the conditions of this licence then the site shall be closed until such time as the defective items are repaired or replaced, unless otherwise authorised by the Waste Regulation Authority in writing.

D2. Leakages and Spillages

A stockpile of suitable absorbent materials shall be kept on the site and shall be immediately used in the event of any leakages and/or spillages of fluids at the site.

E. POLLUTION CONTROLS

E1. Dust

In the event of any emission of dust from the site the site surface and, if necessary, any wastes awaiting removal from the site shall be sprayed with water to suppress the dust.

E2. Amenities

The site shall be operated in such a manner so as to prevent detriment through noise, vibration, smoke, smell or visual impact to the amenities of the adjoining locality.

E3. Fires

No waste material deposited at the site shall be burnt within the boundaries of the site. Any outbreak of fire at the site shall be treated as an emergency and immediate action shall be taken to extinguish it. Any such outbreaks of fire shall be notified to the Waste Regulation Authority.

E4. Litter

At least once daily the site shall be cleared of any loose waste which may be lying on the site. Any waste which becomes windblown from the site shall be immediately gathered and returned to the site.

E5. Vermin and Insects

All necessary measures shall be undertaken to deal effectively with any vermin or insects on the site.

E6. Site Drainage System.

a) Drainage of surface water

All surface water run-off from the site shall be collected by the sealed surface water drainage system specified in the Working Plan. The collection sump of this drainage system shall be emptied regularly in accordance with the Working Plan in order to ensure that the sump never overruns.

b) Drainage onto the site

Methods shall be adopted as specified in the Working Plan in order to prevent the drainage of water onto the site from the surrounding land.

F. SITE RECORDS

F1. Site Records

Site records shall be made as specified in (a) to (c) below.

a) Wastes received at the site

A record shall be made of the types and quantities of all loads of commercial, industrial and asbestos wastes received at the site. The form of the record shall be submitted to the Waste Regulation Authority in writing within one month of the date of issue of this licence for its written agreement and shall include details of:-

- i) The name of the driver and the company delivering the waste,
- ii) the registration number of the vehicle delivering the waste,
- iii) the date and time of the delivery,
- iv) the type and quantity of the waste being delivered, and
- v) the District of origin of the waste.

The record shall be signed by the site operative booking the waste in and the driver of the vehicle delivering the waste.

b) Wastes removed from the site

A record shall be made of the types and quantities of wastes removed from the facility. The form of the record shall be submitted to the Waste Regulation Authority in writing within one month of the date of issue of this licence for its written agreement and shall include details of:-

- i) The name of the driver and the company removing the waste,
- ii) the registration number of the vehicle being used to remove the waste,
- iii) the date and time of the removal,
- iv) the type and quantity of waste being removed,
- v) whether the waste was despatched for disposal or recycling, and
- vi) the name and address of the site where the waste is to be delivered.

The record shall be signed by the site operative booking the waste out and the driver of the vehicle removing the waste.

The removal of contaminated water from the surface water drainage system or from the drainage of any bunds at the site shall be considered as a removal of waste for the purposes of this condition.

F1. Site Records (continued).

c) Monthly summaries.

A monthly summary of the records required to be kept by Conditions F1(a) and F1(b) shall be made. This summary shall include the following details for each waste type accepted at or removed from the site for each month:-

- i) Waste type,
- ii) total quantity per waste type,
- iii) whether the waste was delivered to or removed from the site,
- iv) the district of origin or destination of the waste,
- v) whether the waste was sent for disposal or recycling, and
- vi) the district of disposal of the waste, **or**
- vii) the name and address of the recycling facility.

F2. Records of Waste Analysis.

A record shall be made of the results of any sampling or analysis of wastes carried out under the requirements of condition C3 of this licence.

F3. Retention and Surrender of Site Records

All records required to be made under conditions F1 and F2 shall be securely kept at the site office or the licence holder's offices at:

AD Waste Limited,
3 Hilliards Court,
Chester Business Park,
Wrexham Road,
Chester.
CH4 9QX

The site operator shall keep these records for the duration of the site licence unless otherwise authorised in writing by the Waste Regulation Authority.

F4. Submission of Records to the Waste Regulation Authority

Copies of the monthly summaries required by condition F1(c) of this licence shall be forwarded to the Waste Regulation Authority within the month following that to which the records relate.

F5. Inspection of Records

All records required to be kept under conditions F1 and F2 of this licence must be made available to any authorised representative of the Waste Regulation Authority for inspection at any reasonable time.

F6. Visitors Book

A visitors book shall be kept at the site office. All persons visiting the site for any reason other than to deposit or remove waste shall be required to sign the visitors book.

The book shall record the following details:

- i) Name of person visiting the site,
- ii) time of arrival at the site,
- iii) purpose of visit to the site, and
- iv) time of departure from the site.

F7. Site Diary

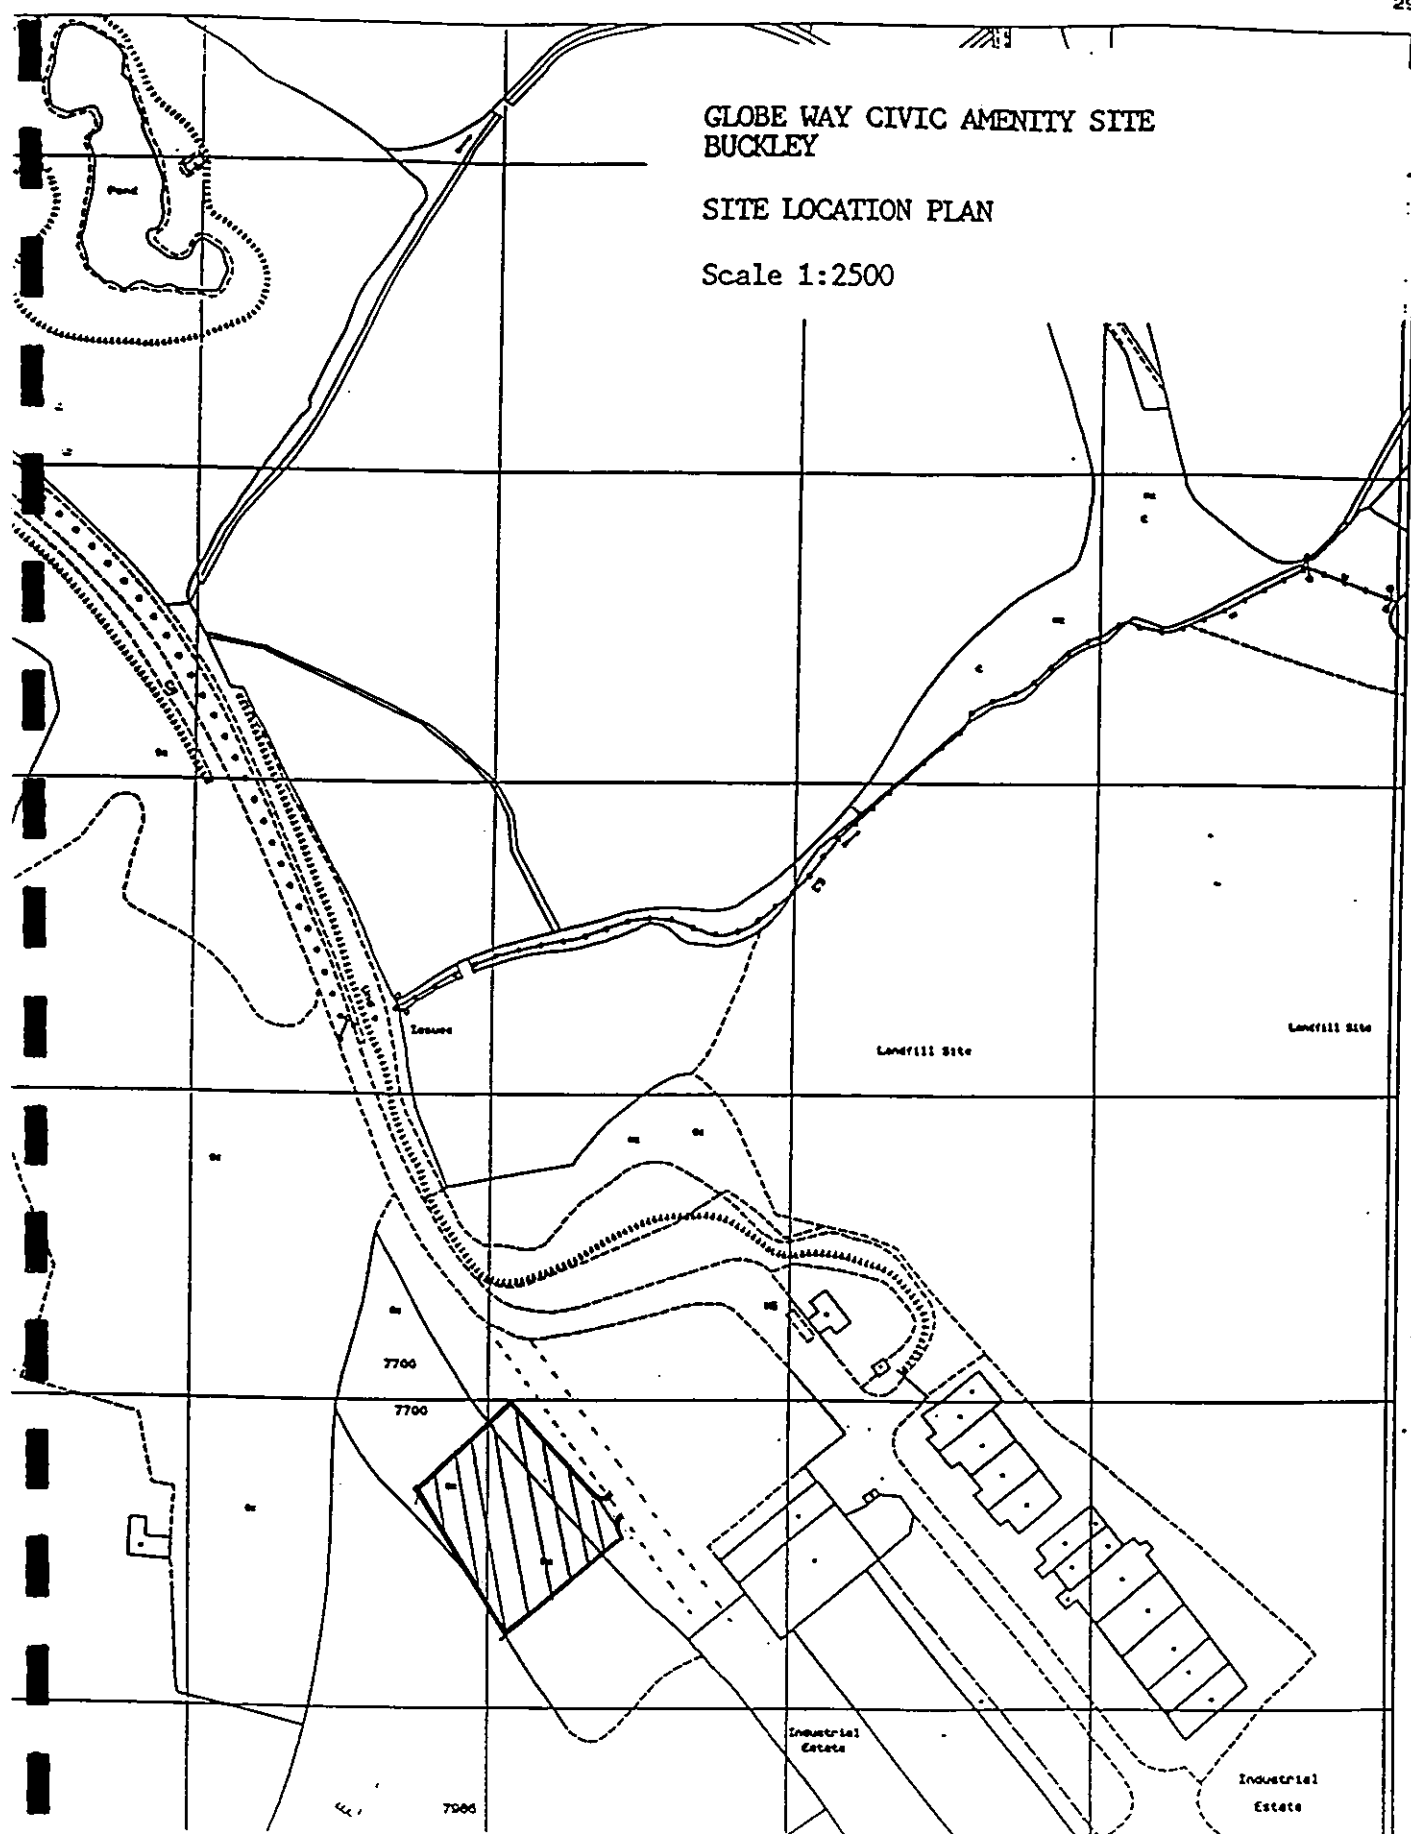

A site diary shall be kept and maintained at the site office. The diary shall record full details of:

- i) Repairs and maintenance to the site plant and infrastructure,
- ii) site engineering works,
- iii) pest control visits,
- iv) outbreaks of fire,
- v) deposits of unauthorised wastes,
- vi) temporary cessation of operations, and
- vii) other significant events concerning the operation of the site.

APPENDIX 2.

PERMITTED TYPES AND QUANTITIES OF WASTES.

1. Permitted Types of Wastes.

- i) HOUSEHOLD WASTES as defined by the Environmental Protection Act 1990, the Controlled Waste Regulations 1992 (S.I. 1992 No. 588) and the Waste Management Licensing Regulations 1994 (S.I. 1994 1056) (or any subsequent replacement legislation), excluding any clinical wastes as defined by the 1992 Regulations, including:-
 - a) CEMENTED ASBESTOS SHEETS produced on household premises only and which are only to be deposited in accordance with Condition C4 of this licence.
 - b) WASTE OILS produced on household premises only and which are only to be deposited in accordance with Condition C5 of this licence.
 - c) SPECIAL WASTES, consisting only of vehicle batteries produced on household premises only, as defined by the Control of Pollution Act 1974 and the Control of Pollution (Special Waste) Regulations 1980 (S.I. 1980 No. 1709) produced on household premises only and which are only to be deposited in accordance with Condition C6 of this licence. No other Special Wastes shall be accepted for deposit at the site.
- ii) COMMERCIAL WASTES as defined by the Environmental Protection Act 1990, the Controlled Waste Regulations 1992 (S.I. 1992 No. 588) and the Waste Management Licensing Regulations 1994 (S.I. 1994 1056) (or any subsequent replacement legislation), excluding any clinical wastes as defined by the 1992 Regulations.
- iii) INDUSTRIAL WASTES, consisting only of wastes arising from tunnelling or from any other excavation, as defined by the Environmental Protection Act 1990, the Controlled Waste Regulations 1992 (S.I. 1992 No. 588) and the Waste Management Licensing Regulations 1994 (S.I. 1994 1056) (or any subsequent replacement legislation) and which are only to be deposited in accordance with Condition C7 of this licence.

2. Permitted Weekly Quantities of Wastes.

Waste Type	Maximum Quantity per Week (Tonnes).
Household Wastes	96.00
Commercial Wastes	10.00
Industrial Wastes	10.00

APPENDIX 3.

SOIL CLASSES A TO E - LIMITS OF RANGES FOR CONTAMINATION LEVELS.

Ranges of permitted contamination (mg/kg on air dried soil, except for pH).

Symbol	Parameter	Soil Class A (Max)	Soil Class B (Max)	Soil Class C (Max)	Soil Class D (Max)	Soil Class E (Max)
	pH (acid)	7	6	5	4	2
	pH (alkali)	8	9	10	12	12
Sb	Antimony	30	50	100	500	500
As	Arsenic	30	50	100	500	500
Cd	Cadmium	1	3	10	50	50
Cr	Chromium	100	200	500	2 500	2 500
Cu	Copper (available)	100	200	500	2 500	2 500
Pb	Lead (total)	500	1 000	2 000	10 000	10 000
	Lead (available)	200	500	1 000	5 000	5 000
Hg	Mercury	1	3	10	50	50
Ni	Nickel (available)	20	50	200	1 000	1 000
Zn	Zinc (available)	250	500	1 000	5 000	5 000
	Zinc (equivalent)*	250	500	2 000	10 000	10 000
B	Boron	2	5	50	250	250
Se	Selenium	1	3	10	50	50
Bd	Barium	500	1 000	2 000	10 000	10 000
Be	Beryllium	5	10	20	50	50
Mn	Manganese	500	1 000	2 000	10 000	10 000
V	Vanadium	100	200	500	2 500	2 500
Mg	Magnesium	500	1 000	2 000	10 000	10 000
SO	Sulphate	2 000	5 000	10 000	50 000	50 000
S	Sulphur (free)	100	500	1 000	5 000	5 000
	Sulphide	10	20	100	500	500
CN	Cyanide (free)	1	5	50	100	100
	Cyanide (total)	5	25	250	500	500
	Ferricyanide	100	500	1 000	5 000	5 000
	Thiocyanate	10	50	100	500	500
	Coal Tar	500	1 000	2 000	10 000	10 000
	Phenols	1	5	50	250	250
	Toluene Extract	5 000	10 000	50 000	250 000	250 000
	Cyclohexane Extract	2 000	5 000	20 000	100 000	100 000
	PCBs	1	3	10	50	50
	Polyaromatic					
	Hydrocarbons	50	500	1 000	5 000	5 000
	Chlorinated Solvents	1	3	10	50	50

* See Note 7 overleaf.

APPENDIX 3 (CONTINUED).

SOIL CLASSES A TO E - LIMITS OF RANGES FOR CONTAMINATION LEVELS.

NOTES:

1. Soil Class A: Uncontaminated soil.
 Soil Class B: Slightly contaminated soil.
 Soil Class C: Contaminated soil.
 Soil Class D: Heavily contaminated soil.
 Soil Class E: Unusually heavily contaminated soil.
2. In the event of a measured contaminant level falling exactly on the boundary of two soil classes then the upper (more heavily contaminated) soil class should be assumed.
3. Only soil class A can be disposed of at an inert landfill site. Soil Classes B, C, D, and E must be disposed of at a suitably licensed landfill site.
4. In the cases of Soil Classes D and E an analysis must be carried out to determine whether the soil is a Special Waste and, if so, its disposal carried out in accordance with the Control of Pollution (Special Waste) Regulations 1980 (S.I. 1980 No. 1709) or any subsequent replacement legislation.
5. Unless specifically stated otherwise, contamination levels are for total concentration of contaminant, extractable by $\text{HClO}_3/\text{HClO}_4$ (ICRCL Guidance Note 59/83, Second Edition).
6. Available concentration of contaminant determined by standard ADAS method (soluble in hot water) (ICRCL Guidance Note 59/83, Second Edition).
7. Zinc equivalent: Combination of copper, nickel and zinc.
8. For contaminants not listed it must be assumed that the soil is not permitted (unless specifically permitted by a Condition of the Waste Management Licence).
