

Browns Group Ltd.
Former Morlais Colliery Site
Emergency Procedures

The safety policy adopted by Browns Group Ltd will be adhered to at all times. However there is a remote possibility of accidents occurring and the procedures adopted under those circumstances are to be clearly explained and understood by all employees. Where necessary training will be provided.

Industrial Injury.- Site accident.

Any accident occurring on site must be reported to the site manager and a full record of the incident must be recorded both in any formal forms in the Case of a serious accident or in the site accident book for minor accidents.

Advice on suitable treatment must be sought unless the accident is of a serious enough nature to require attendance by the Emergency Services which will be sought without delay.

Fire.

In the event of a fire being detected on site, the following procedures must be implemented without delay.

- All personnel on site, identified by checking the visitors book if necessary, are located and escorted to the emergency assembly point at the main entrance gate.
 - Fire extinguishers and / or water sprays are to be directed at the base of the fire if it is safe to do so.
 - Emergency Services notified. Senior staff member on site to liaise with the senior emergency officer and provide assistance if requested.
 - Natural Resources Wales to be notified as soon as reasonably practical.
 - A full report of the incident to be prepared and a record entered in the site diary.
-
