OGWR BOROUGH COUNCIL

CONTROL OF POLLUTION ACT 1974

LICENCE TO DISPOSE OF WASTE

The Ogwr Borough Council in pursuance of the powers conferred on them by the Control of Pollution Act 1974, hereby licence:-

Broughshire Limited  
Litchard Industrial Estate  
Bridgend  
Mid Glamorgan  
CF31 2AL

hereinafter called the "licence holder" to operate a yard for the purpose of scrap metal sorting and storage (hereinafter called the "facility") on land at Plot 9A, Litchard Industrial Estate, Bridgend which is edged in red on the drawings attached to this licence, being land occupied by the licence holder.

This licence is granted subject to the conditions set out in the schedules attached hereto.

BOROUGH ENVIRONMENTAL HEALTH OFFICER

\*THE LICENCE HOLDER'S ATTENTION IS DRAWN TO THE NOTES OVERLEAF\*

## NOTES

These notes are for general guidance only and they do not constitute an authoritative statement of the law.

1. This licence relates only to the requirements of the Control of Pollution Act 1974 for the deposit of waste and the use of plant or equipment subject to the conditions set out in the Schedules and does not constitute a consent required by other legislation. In particular it is the responsibility of the licence holder to comply with any requirements of THE HEALTH AND SAFETY AT WORK ETC. ACT 1974, THE RADIOACTIVE SUBSTANCES ACT 1960, THE TOWN AND COUNTRY PLANNING ACTS, BUILDING REGULATIONS, and ALL RELEVANT WATER PROTECTION and PUBLIC HEALTH legislation including the provisions of the ENVIRONMENTAL PROTECTION ACT 1990 currently in force.

All discharges to sewer and watercourse have to meet the requirements of the Water Company and National Rivers Authority respectively. Any diversion or other changes will also require approval from each respective organisation.

2. If the licence holder ceases to occupy the land specified above, then he may transfer the licence to the new occupier after giving notice to the waste disposal authority which has the right to decline to accept the new licence holder.
3. If the licence holder wishes to cancel this licence, he must return it to the disposal authority together with a notice stating that he no longer requires the licence. Cancellation of the licence will not affect any outstanding liability of the licence holder under the conditions of the licence.

## Contravention of Licence Conditions

Your attention is drawn to the provisions of Sections 3, 7, 9 and 16 of the Control of Pollution Act 1974. A brief resumé is included below.

### Section 3

Prohibits under penalty the deposit of waste, or the use of plant or equipment, otherwise than in accordance with the terms of a licence. This Section applies to all the conditions contained herein, including any which may be the subject of appeal to the Secretary of State under Section 10 of the Act.

Any deposit which takes place without compliance with all the licence conditions may lead to prosecution under this Section.

Site Licence No. S5

Sheet 3 of 10

Section 7

Activities which cause pollution of water, danger to public health or would be seriously detrimental to the amenities of the locality may lead to revocation of this Licence.

Section 9

Non-compliance with any licence conditions may lead to the revocation of this licence.

Section 16

The licensing authority is empowered to require the removal of any controlled waste deposited in circumstances where any of the conditions contained in this licence are not being complied with.

Penalties under Section 3

A person who contravenes Section 3 subsection (1) shall, subject to subsection (4), be guilty of an offence and liable on summary conviction to a fine of an amount not exceeding scale 5 (currently £5,000) or on conviction on indictment to imprisonment for a term not exceeding two (2) years or a fine or both.

## SCHEDULE A

Site Licence No. S5

Sheet 4 of 10

### DEFINITIONS

1. In this licence an "emergency" is defined as a case where a person has reasonable cause to believe that circumstances exist which are likely to endanger life or health or cause damage to property or pollution of water.
2. Liquids which are "flammable", "highly flammable" or "extremely flammable" shall have the same meaning ascribed to them as detailed in Schedule 1, Part I of the Classification, Packaging and Labelling of Dangerous Substances Regulations 1984.
3. A "competent person" shall for the purposes of this licence mean a person who through training and/or qualification understands the terms and conditions of this licence and is responsible for ensuring the facility's compliance with the licence.
4. In this licence "environmental hazard" is defined as the presence of waste on land which has been deposited in such a manner or in such a quantity (whether that quantity by itself or cumulatively with other deposits of the same or different substances) as to subject persons or animals to a material risk of death, injury or impairment of health or as to threaten the pollution (whether on the surface or underground) of any water supply.
5. An "authorised officer" is an officer authorised by the disposal authority for the purposes of the Control of Pollution Act 1974.
6. In this licence "operation" is defined as the receipt, handling or removal of waste from the facility.
7. Notwithstanding the above, words and phrases in this licence have the meaning ascribed to them by the Control of Pollution Act 1974 and its associated regulations.

SCHEDULE B

Site Licence No. S5

Sheet 5 of 10

TYPES OF WASTE

The types of waste materials acceptable at the facility and the maximum quantities stored shall consist only of the following:-

Electrical Cable	10 tonnes
Non Ferrous Swarf	7 tonnes
Other Non Ferrous Metals	40 tonnes
Ferrous Metals	20 tonnes

EXCLUSIONS

Notwithstanding the generality of the types of waste specified in this Schedule the following wastes shall be specifically excluded from delivery to the facility without the prior written approval of the disposal authority.

- (a) Controlled waste being defined as "special waste" in the Control of Pollution (Special Waste) Regulations 1980 and any subsequent amendments.
- (b) Substances within the control of Radioactive Substances Act 1960 and subsequent amendments.
- (c) Percussives and explosives and other substances with similar characteristics, excepting where such wastes are in such a form or state where the percussive or explosive properties are and will remain ineffective.
- (d) Any waste containing flammable liquids.
- (e) Any waste containing elemental sodium or potassium or any metal which is in a fine powdered form.
- (f) Any waste containing polychlorinated biphenyls or analogues.

SCHEDULE C

CONDITIONS

Working Plan

1. (a) The statement of intended methods of operation and drawings contained within the document entitled "Site Licence Application Working Plan" submitted as part of the application for this licence shall be hereinafter referred to as the Working Plan.
- (b) Subject to the terms and conditions of this licence the site shall be operated in accordance with the Working Plan and declarations made in the Site Licence Application.

Preparation

2. Lighting in accordance with the Working Plan shall be provided at the facility for those operations which are to be carried out during the hours of darkness, as defined by the statutory lighting up times published by the Science and Engineering Research Council.
3. An identification board of durable material and finish shall be maintained and displayed in a prominent position at the facility. This shall give the name, address and telephone number of the operator and the disposal authority, the hours of operation and the telephone numbers of personnel to contact in the event of an emergency.
4. Fencing, gates and walls shall be provided at the facility and maintained at all times in accordance with the Working Plan. The gates shall be locked outside operating hours and at any time the site is left unattended in order to prevent unauthorised access, deposit of or removal of materials from the facility. The fencing, gates and walls shall be inspected daily by the operator and any damage observed shall be temporarily repaired within 24 hours of the damage being identified.
5. In accordance with the detail of the Working Plan office facilities shall be provided.
6. The yard area of the facility shall be surfaced and maintained in accordance with the Working Plan. Yard surfaces shall be cleaned as necessary and when requested by the disposal authority.
7. Site drainage arrangements shall be constructed and maintained in accordance with the working plan so that water does not accumulate at the facility. These shall include interception of contaminated surface water and spillages to prevent contamination of the drainage system or any water course or ground water.
8. The storage compound shall be enclosed with steel cladding in accordance with the Working Plan.

9. Provision shall be made to deal with unacceptable waste delivered to or left at the facility in accordance with the Working Plan. Such waste shall be removed from the facility as soon as practicable or within such a time as may be agreed with the disposal authority and taken for disposal to a facility licensed for its disposal.
10. Waste material and other materials segregated for resale or reuse shall be loaded, unloaded, sorted and stored only in the designated storage areas indicated in the Working Plan.
11. If required by the disposal authority any waste or other material segregated for reuse or resale shall be removed forthwith if, in the opinion of the disposal authority, it is likely to give rise to pollution of water, danger to public health or be seriously detrimental to the amenities of the locality.
12. Provisions shall be made at the facility for the loading and unloading of vehicles transporting wastes to and from the facility in accordance with the Working Plan.
13. Facilities shall be provided in accordance with the Working Plan for storing and maintaining equipment used at the facility.
14. Tanks or drums used for the storage of liquids which may be polluting shall be contained in a bunded compound whose volume is at least 25% of the total volume or 125% of the volume of the largest storage vessel whichever is the greater.
15. A diary/log book shall be provided and retained on site. The diary/log book shall be available for the Licence Holder and for Authorised Officers of the disposal authority to read or record comments pertaining to the activities at the facility.

Operations

16. Within 6 months of the issue of this licence all preparatory works shall have been completed.
17. During all operational and maintenance periods the facility shall be manned by a competent person who is capable of ascertaining in accordance with the terms of the Working Plan and having regard for information supplied with waste materials, that only waste permitted by the licence are deposited at the site.
18. The types of waste and maximum quantities stored at the facility shall consist of those specified in Schedule B of this licence.
19. There shall be no processing or treatment of any waste at the facility except for those operations described in the Working Plan.
20. Wastes shall be delivered to and removed from the facility only on Mondays to Saturdays between the hours of 7.30 a.m. and 4.30 p.m. Except in cases of emergency no delivery or removal of waste shall take place outside these hours or on Sundays or Bank Holidays. All circumstances of emergency shall be reported forthwith to the disposal authority.
21. A record shall be kept of the types and quantities of waste removed from the facility giving details of the final destination, including materials inadvertently delivered and subsequently removed from the facility. The record shall comprise full details, as required, on forms as agreed with the disposal authority and copies shall be sent to the disposal authority at six monthly intervals. These records must be made available to any Authorised Officer of the disposal authority for inspection at the facility at any reasonable time.
22. All wastes before and after processing shall be stored in skips or security containers and no waste shall be stockpiled on open ground.
23. No storage of waste or other materials shall take place outside the building or the storage compound. No material shall be stored to a height greater than that of the surrounding steel cladding.
24. No waste material shall be burnt within the boundaries of the facility. Any fire occurring within the confines of the facility shall be treated as an emergency and immediate action shall be taken to extinguish it. All outbreaks of fire shall be reported immediately to the disposal authority. Fire fighting equipment and emergency water supplies shall be provided in accordance with the Working Plan and regularly maintained.
25. Measures in accordance with the Working Plan shall be taken to ensure that mud, debris or any other material is not deposited on the roadway by vehicles leaving the facility. These measures shall include the cleaning of the yard entrance and public highway leading from the facility.

26. Site drainage arrangements shall be maintained to ensure the interception of contaminated surface water and spillages and to prevent contamination of the drainage system or any water course or ground water.
27. The facility shall be inspected daily for the presence of vermin and insects and control measures shall be taken as detailed in the Working Plan to deal with any vermin or insects found. Records of these inspections and any control measures undertaken, including types and quantities of pesticides used, shall be kept permanently on site.
28. Standby operating and disposal arrangements in accordance with the Working Plan shall be implemented in the case of an emergency at the facility. The disposal authority shall be immediately informed whenever these arrangements are implemented.
29. Litter shall not be allowed to accumulate at the facility. Any litter or fly tipped material which accumulates at the facility or its immediate environs shall be gathered and disposed of in such a way as to prevent pollution of water, danger to public health or be seriously detrimental to the amenities of the locality.
30. Measures, including proper maintenance and use, shall be undertaken to control the noise of machinery and vehicles operating at the facility to ensure it is not seriously detrimental to the amenities of the locality.
31. Any cessation of operations for a period in excess of 3 months shall be notified to the disposal authority. Not less than 14 days notice shall be given to the disposal authority of the date on which operations are to recommence in the event of such a cessation.
32. A copy of any notice or instruction received in respect of the facility from any authority, other than the disposal authority, which in any way relates to the use of the facility, shall be forwarded for information to the disposal authority within three working days of the receipt of such notice or instruction.
33. The terms and conditions of this licence shall be made known to any person who is given responsibility for the management or control of the facility and a copy of these terms and conditions shall be kept available at the facility and displayed in a prominent position.
