Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This is a variation consisting of:

- An operator initiated administrative variation to add the waste code 16 01 21* to the permit, with the understanding that this waste code is consisting of catalytic convertors only. Additionally, there will be no treatment of this waste type under the permit.
- Table S.1.1 has been amended to reflect that there is to be no treatment of 16 01 21*.
- A regulator-initiated variation to add in conditions relating to fire risk mitigation and to correct the waste code from 03 02 06* to 13 02 06*.
- An update to the status log to show the correct numbering of the previous variation.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
