Measures taken, or intended to be taken, to prevent a recurrence of the incident	<p>We would like to withdraw Part A Notification EP_EX_219 as the average result of the 3 runs was 9.2 mg/Nm³ and was below the ELV of 10 mg/Nm³. Testing was performed 16/10/2018 between 0940 and 1250.</p> <p>2 out of 3 runs were in excess of the ELV but the overall average was below the ELV. Exova did not highlight any differences between the runs that might explain the lower result for the second run. From a process perspective the only difference between the runs was that there were short line stops associated with product changes during runs 1 and 3. The same periods were used to take particulate samples and these produced consistent results across the three runs.</p> <p>No further action is proposed at this time.</p>
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	It is believed that no permanent harm will result from the incident.
