**Subject:** Consolidation of permits

Hi Matt

Kate has passed your query onto me look at.

As Kate previously mentioned until Permit SP3998VE is transferred to you we would not be able to consolidate that with the other permits.

To transfer this permit it would be a fee of £1950 if the management was to remain the same or appropriate tier 3 charge for the permit.

With regards to consolidating the three other permits held by Swansea Council as two of the permits would need to be updated to modern conditions as part of the consolidation and therefore attract the minor technical variation fee which is either £1280 (per permit) or the tier 3 bespoke whichever is cheaper (in this case the fixed fee is cheaper for you) and then it would be a normal variation to vary EP3399VE to consolidate all the permits. This would be a total cost of £4089.

If you wished to vary any of the permits in any other way the appropriate variation charge would apply and could cost you more and if you were to transfer the four permit prior to consolidation we would also have to take that into account which could add at a minimum another £1280 to the cost.

If you did not need to vary the permits to enable consolidation the cost would be that of three normal variations based upon the OPRA profiles for each site and the total cost would be £17097.

With regards to timescales this can be difficult to estimate, we have three months to determine a variation and at present our work queue is fairly small but this can quickly change. We would aim to get any application determined as soon as practical.

If you have any more question please let me know.

Regards  
Hannah
