

Notice of request for more information

Environmental Permitting (England and
Wales) Regulations 2016

Notice requiring further information

To: Company Secretary
Massey Metals
River Lane
Saltney
Chester
CH4 8RH

Application number: PAN-001701

Natural Resources Wales, in exercise of its powers under paragraph 4 of Part 1 of Schedule 5 of the above Regulations, requires you to provide the information detailed in the attached schedule. The information is required in order to determine your application for a permit, dated **29/06/17**.

The information requested should be sent to the following address by 11th **August 2017**.

Information should be sent to:

Permitting Service (Cardiff)
Natural Resources Wales
Cambria House
29 Newport Road
Cardiff
CF24 0TP

Name	Date
Hannah Loughlin	28/07/17

Authorised on behalf of Natural Resources Wales

Schedule

- The fire prevention plan and the Environmental Management system need to be updated to reference the correct regulator. Natural Resources Wales is the regulator for this site. Please amend both documents to reflect this.
- You have stated that you intend to register exemptions to cover storage of some wastes on site. As the permit will cover storage what would be the need to apply for exemptions to cover storage?
- Marco Muia has been listed as the TCM for the site but we are aware that he is an employee of Oaktree Environmental Ltd and acts as the TCM on behalf of other operators. How can Mr Muia fulfil the requirements to be present on site for the required time and get to the site within the required timeframe if an incident was to occur.
- The site specific risk assessment does not provide sufficient information with respect to the SSSI, SPA and RAMSAR site (River Dee) that is located within 1km of the proposed site. The risk assessment should take into account the relevant conservation objectives for the SSSI, SPA and RAMSAR which can be found here: [Designated-sites](#) and outline what mitigation measures, management systems or why the activity won't negatively impact the designated site. Please provide a site specific risk assessment that provides the outlined information.
- The fire prevention plan submitted does not meet the requirements of our current guidance which can be found here: [nrw-fire-prevention-guidance](#). All areas outlined in this guidance should be covered in detail within the fire prevention and mitigation plan and if you intend to deviate from the prescribed guidance justification as to doing so needs to be provided. Please provide a fire prevention and mitigation plan that meets with our current guidance.
