Introductory note

This introductory note does not form a part of the permit

The following notice, which is issued pursuant to regulation 20 and Part 1 of Schedule 5 of the Environmental Permitting (England and Wales) Regulations S.I.2007 No. 3538 (the Regulations), gives notice of the variation of an environmental permit to operate a regulated facility.

This variation is to update the existing permit in line with regulatory changes i.e. Hazardous Waste Regulations. Following the introduction of these regulations some wastes accepted at the site which were previously not classified as special waste are now classified as hazardous waste. This variation also requests additional waste codes.

This variation also seeks to amend the previously accepted site layout. The previous layout consisted of a number of storage areas across the whole of the site. The new layout concentrates all waste operations in the south-eastern corner of the Cillefwr Depot. Most of the waste operations are carried out within a secure, engineered compound. The exception to this is sweeper wastes which are stored in a secure bunker adjacent to the main compound..

Schedule 1 of this notice lists any deleted conditions, Schedule 2 lists any amended conditions and Schedule 3 lists any conditions that have been added.
