Dear Sirs,

Kings Dock Swansea

On behalf of Glass Tech Recycling Ltd, Geotechnology recently submitted a bespoke permit application for a proposed operation at Kenfig Industrial Estate. Since submittal, Glass Tech has identified a more suitable site at Swansea Docks. On this basis, the local officer familiar with the activities of Glass Tech (Mr Gareth Davies) has been in contact with Ella Williams in the Permitting team to identify the best way forward.

Following this discussion we withdrew the Kenfig application. Please now find enclosed the application for the Swansea Docks site. We understand that NRW has retained the application fee. To help with tracking this process, we have been provided with the following reference numbers: WPCC2826, EAWML 900140 and EPR-YB3993HW. Permitting Office Ella Williams should be familiar with the situation.

Please do not hesitate to get in touch should there be any queries.

Yours faithfully,

GEOTECHNOLOGY LIMITED

Ben Rees
