Introductory note

This introductory note does not form a part of the permit

The main features of the permit are as follows.

The Sandycroft Waste Management Centre lies within a larger site owned by the Operator on Prince William Avenue, Deeside. The site lies approximately 500 metres to the north east of Sandycroft, and 2.5 kilometres east of Queensferry. The River Dee is approximately 150 metres to the North East.

The facility will consist of a waste transfer station for hazardous waste and a solvent bulking plant. The transfer station will receive packaged waste which will be sampled, sorted and segregated prior to being sent off-site for recovery or disposal. The solvent bulking plant will consist of two solvent storage tanks (2 x 30.5m³) within a bunded area where suitable materials will be bulked and then sent for recovery or disposal off-site. The annual throughput of waste is 30,000 tonnes.

There will be one emission point to air from the solvent bulking plant. There are no emissions from the site to sewer or surface water.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.

END OF PERMIT

Permit Number: EPR/BB3397HN

Operator: Qualitech Environmental Services Limited

Facility: Sandycroft Waste Management Centre

Form Number: Air 1 / 30/08/2019

Reporting of emissions to air for the period from DD/MM/YYYY to DD/MM/YYYY

Emission Point	Substance / Parameter	Emission Limit Value	Reference Period	Result ^[1]	Test Method ^[2]	Sample Date and Times ^[3]	Uncertainty ^[4]
A1	TVOC as Total Organic Carbon (TOC)	20 mg/Nm ³	1-hour period		BS EN 12619		
A1	Mass emissions (kg/h)	None set	1-hour period		BS EN 16911-1 and MID		

- [1] The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a range, the result is given as the 'minimum – maximum' measured values.
- [2] Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with Natural Resources Wales is used, then the appropriate identifier is given. In other cases, the principal technique is stated, for example gas chromatography.
- [3] For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements the percentage of the process operating time covered by the result is given.
- [4] The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated.
