Dear Sir/Madam

**Re: ENVIRONMENTAL PERMIT VARIATION APPLICATION – PERMIT REF.:
EPR/KB3097TU**

**CWM ENVIRONMENTAL LIMITED – MATERIALS RECYCLING FACILITIES,
NANTYCAWS WASTE MANAGEMENT SITE, LLANDDAROG ROAD, NANTYCAWS,
CARMARTHEN, SA32 8BG**

Please find enclosed one paper copy and one electronic copy (CD-ROM) of an Environmental Permit Variation Application on behalf of CWM Environmental Limited. This is in relation to the following:

- The consolidation of Environmental Permit Reference EPR/HP3098FA Pre-Treatment Area Permit into Environmental Permit (EPR/KB3097TU) for the Residual Waste Materials Recycling Facility (RWMRF) and to amalgamate the permit boundaries as appropriate.
- The consolidation of Environmental Permit Reference EPR/YB3293HL ('Clean' MRF) into Environmental Permit (EPR/KB3097TU) (RWMRF), allowing for the operation of both MRF's as one bespoke operation going forward. This will also require the amalgamation of permit boundaries and addition of both currently permitted annual throughputs to provide a combined annual throughput of 200,000 tonnes per annum.
- Restate that the 75 tonnes per day limit associated with the pre-treatment (for recovery) of permitted wastes for the A1 Activity Reference (Waste Transfer Station) and A2 Activity Reference (Refuse Derived Fuel processing facility) will not apply to treatment activities conducted at the site. This limit is only relevant where the express purpose is to directly and intentionally change the nature of the waste in a way that improves its quality as a fuel e.g. calorific (or heating value), moisture content, ash content, chemical composition and heavy metal content.

The application in terms of its class of variation and application fee has been confirmed by Louise Bailey (Permitting Officer) at Natural Resources Wales (NRW) as constituting a Normal Variation. A Normal Variation application fee would usually be calculated via the use of the

variation multiplier and the current OPRA score for the site. However, it has been confirmed during pre-application discussion with NRW (Louise Bailey), that given that the three Environmental Permits to be varied (RWMRF, 'Clean' MRF and Landfill Pre-Treatment Area) are already in the modern Environmental Permit template and have such been adequately risk assessed relatively recently, the application fee charge would equate to a Minor Technical charge, per Permit to be varied. This attracts an application fee of the £1,280 x 3 which equates to £3,840. Please find a cheque for this amount attached.

It would be most appreciated if confirmation of receipt could be provided via email to Lucy.Edds@thesiriusgroup.com , or hard copy to the above address details.

Should you have any queries with regards to the attached submission, please do not hesitate to contact me.

Yours sincerely

A handwritten signature in cursive script, appearing to read 'LJ Edds'.
