Environment Agency Permitting decisions

We have decided to vary the permit for Nantycaws Waste Storage and Treatment Facility, CWM Environmental Limited.

The permit number is EPR/HP3098FA

The operator is CWM Environmental Limited

The facility is located at Llanddarog Road, Nantycaws, Carmarthen, SA32 8BG

The decision was effective from 06/04/10

Summary of the decision

We have decided to vary the permit for the operator, subject to the conditions in the permit.

This variation changes the facility type from a Civic Amenity site to a Bespoke Household, Commercial and Industrial waste Transfer Station with Treatment – No Building up to 75,000 tonnes per annum throughput. This variation also changes the site boundary to that shown in the site map in this notice.

We consider in reaching that decision we have taken into account all relevant considerations and legal requirements and that the permit will ensure that the appropriate level of environment protection is provided.

Purpose of this document

This decision document:

- explains how the applicant's application has been determined;
- provides a record of the decision-making process;
- shows how all relevant factors have been taken into account;

Unless the decision document specifies otherwise we have accepted the applicant's proposals.

Structure of this document

- Key issues of the decision;
- Annex 1 the decision check list;
- Annex 2 the consultation responses.

Key issues of the decision

Environmental risk

There is little environmental risk resulting from this variation as the site was operating as a civic amenity site and so the waste types have not changed drastically. The through put has increased but the site has the appropriate infrastructure in place to deal with this.

A SCR was provided and assessed by GWCL team. The GWCL team are satisfied with this SCR, stating they are happy with the infrastructure on site and would expect the base line condition of the site under the concrete to be uncontaminated.

Air quality

The site has no building, however this is a bespoke permit and the site is not within an air quality management zone.

The facility

The facility boundary has changed as a result of this variation to that shown in the site plan, outlined in green in the variation notice.

Annex 1: decision checklist

Activity		Justification / Detail		Determination criteria met	
Application fee		The application fee is correct for a variation.		✓	No
Commercial confidentiality		The operator has not made a claim for commercial confidentiality. We have not received any information in relation to this application that appears to be confidential in relation to any party.		✓	No
Extent of the site of the facility		The operator has provided a plan which we consider is satisfactory, showing the extent of the site of the facility. A plan is included in the permit at Schedule 2, and the operator is required to carry on the permitted activities within the site boundary.		✓	No
Site condition report		The operator has provided a description of the condition of the site which we consider is satisfactory. The decision was taken in accordance with our guidance report – guidance and templates TGN5.		✓	No
Use of conditions other than those from the template		The permit contains many conditions taken from our permit template. We developed these conditions in consultation with industry having regard to the relevant legislation. This decision document does not include an explanation for these usual conditions. Where such conditions are imposed we have considered that aspect of the operation.		✓	No
Waste types		We have specified the permitted waste types, descriptions and quantities, which can be accepted at the regulated facility in tables S3.2.		✓	No
OPRA					
Optra Score		The Optra score is 48. The Optra score has not changed from that set out in the application.			

Annex 2: consultation responses

Advertising and consultation

Summary of responses to advertising and consultation and the way in which we have taken these into account in the determination process:

Response received from

GWCL

Brief summary of issues raised

Requested **Supporting Statement** for the Permit Variation application.

Summary of actions taken or show how this has been covered

Checked appendix C of SCR - no issues. GWCL would expect the underlying baseline condition of the site to be uncontaminated under the concrete hard standing.
