Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This Natural Resources Wales led variation permits the operator to store waste in an area disputed under the 2013 updated and consolidated permit. Historically the area in dispute was a non-permitted area exempt from the original permit for the storage and recovery of scrap metal or dismantling of depolluted motor vehicles. This additional piece of land is now incorporated into the site boundary as per the updated plan. Operations on the incorporated area shall only commence once the pre-operational and improvement conditions have been met.

IPC 1 is carried over from the varied and consolidated permit EPR/CP3794FR/V002 issued on 28/01/13. The original date for submission of the EMS remains as 4 months from the issue date of the varied permit - EPR/CP3794FR/V002.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
