Dear Sir/Madam,

**Environmental Permit Variation: Permit Number EAWMLYP3698FQ
GREENACRES SKIP HIRE LTD – CELTIC LINK BUSINESS PARK, SCLEDDAU, FISHGUARD,
PEMBROKESHIRE, SA42 0XY**

Please find enclosed our application to vary the above Waste Management License to a Tier 3 Bespoke Environmental Permit.

The purpose of this application is:

- To increase the scope of activities carried out at the site.

The currently permitted activity under the WML is:

- A11 - HCI Waste Transfer Station

The following addition activities are to be added to the existing permitted activities:

- A9 – Storage of Asbestos Cement Bonded on site.

The variation will allow Greenacres to accept up to 50,000 tonnes of waste per annum.

The information attached comprises the formal EP variation documentation, the contents of which are summarised below.

Environmental Permit Application Forms

Part A, C2, C4 and F1 have been completed in line with Environment Agency/Natural Resource Wales's guidance.

Operational Risk Appraisal (OPRA)

A variation fee of £8,976 has been calculated and a completed OPRA profile detailing the operator's systems and competency in support of this has been submitted. Payment of the variation fee will be made by electronic transfer as detailed in Application Form F1.

Environmental Risk Assessment (ERA)

An Environmental Risk Assessment (ERA) accompanies this application.

The ERA demonstrates that the proposed facility does not present a significant risk to the environment. In this respect the operational proposals will manage/control any potential risks that should arise by implementing good management practices.

Environmental Management System (EMS)

The EMS describes the proposed Management System for the facility and includes proposals to manage/control any potential risks that should arise through site design and implementation of good management practices. The working plan provided gives details of environmental hazardous that could arise and the steps to be taken by the operator in the event of such an incident.

The EMS is a live document that forms part of the company's Business Management System. It will be reviewed and updated regularly (in discussion with Natural Resources Wales) and maintained for the lifetime of the facility.

The Environmental management System is an extensive document and for the purposes of providing information to support this application only the contents page and Working Plan have been submitted.

Supporting Documents

A package of supplementary Information (reports, drawings and other documentation) supports this application. These include documents providing information required within the Environmental Permit application documents, details of the regulated facility and its environs, and documents that demonstrate how the applicant will comply with the requirements of any issued permit.

I trust the above information meets with your requirements, however should you wish to discuss or clarify these issues please contact Mr Jonathan Young on 07787438464.

Yours sincerely,

Paul Nicholas
Director
