C4 Special Wastes

The receipt of, deposit at or removal of special waste at or from the site shall be carried out in accordance with the "Control of Pollution (Special Waste) Regulations 1980".

Where special waste is deposited in the site, the location, type and quantity of each deposit shall be recorded in writing, and the record shall be retained in accordance with Condition D3. The location of each such deposit shall be recorded in accordance with the requirements of the "Control of Pollution (Special Waste) Regulations 1980" by reference to either:-

- (a) a plan of the site, divided by a metric grid, which shall show the position of the deposit and its depth with reference to Ordnance Datum; or
- (b) a set of metric overlays of the site, showing the position of the deposit within the appropriate layer within the relevant cell.

C5 Asbestos

Asbestos shall be handled in accordance with the recommendations in Waste Management Paper No. 18. All loads of asbestos shall be immediately covered with non-difficult or non-special wastes upon deposit.

Appendix 2 cont.

Soil Classes A to E - Limits of Ranges for Contamination Levels

Notes:

- (4) In the cases of Soil Class D (heavily contaminated soil) and Soil Class E (unusually heavily contaminated soil) an analysis must be carried out to determine whether the soil is a Special Waste and, if so, the disposal carried out in accordance with the requirements of the "Control of Pollution (Special Waste) Regulations 1980".

Modification shall read:
