Proposal summary

Please provide an outline of your proposal, including any sketches.

As a guide, you should include: a description of the activities which (will) take place at your site, the means of abstraction/impoundment proposed, if the proposal is related to another licence or permit (i.e. an Environmental Permit to Discharge Water) and details of any survey work undertaken. For changes to existing licences, summarise the changes proposed. Sketches or photographs that will aid our understanding of your proposal can be uploaded below.

Looking to capture water from the spring for use as drinking water for the site development and also for making soft drinks.

Water will be captured as it surfaces from the spring. The spring is known to flow all year and is not used to supply drinking water to any others. The spring currently provides water to two water troughs to the east, one of which supplies a neighbours field. Design of capture will ensure these water supplies are unimpacted.

The spring is within the ownership boundary of the farm and this is being progressed as part of the farms diversification.
