H2 - Resource Efficiency - Energy efficiency	Assessed (A)	

Result types are explained in more detail in the 'Important Information' section below.

Total number of non-compliances recorded	Total non-compliance score
0	0

How we use the non-compliance score to calculate your annual fee is explained in the 'Important Information' section below.

2. What action is required?

No action required.

3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

Introduction

This is a part review of the Quarter 1 to Quarter 4, 2021 monitoring submissions made by the operator.

Annual Energy Usage, Water Usage, Performance & Sewer Discharge report have also been reviewed and acknowledged.

Comments/Observations:

Point source emission to water results for emission point W2

Quarter 1 Point source emissions – W2

- The Q1 (January to March 2021) submissions included the results for all quarterly parameters required over this period.
- From the data submitted the results appear to be compliant with the limits specified in the permit.

Quarter 2 Point source emissions – W2

- The Q2 (April to June 2021) submissions included the results for all quarterly parameters required over this period.
- From the data submitted the results appear to be compliant with the limits specified in the permit.

Quarter 3 Point source emissions – W2

- The Q3 (July to September 2021) submissions included the results for all quarterly parameters required over this period.
- From the data submitted the results appear to be compliant with the limits specified in the permit.

Quarter 4 Point source emissions – W2

- The Q4 (October to December 2021) submissions included the results for all quarterly parameters required over this period.
- From the data submitted the results appear to be compliant with the limits specified in the permit.

Annual Production

The annual production tonnages has been reported. The Operator has stated an overall increase in production in 2021 compared with 2020.

Effluent discharge to sewer

The Operator has reported no discharge to sewer during 2021.

Water Usage

The Operator has reported a total water usage increase in 2021 compared to 2020. However, the water use per tonne produced has decreased due to improved efficiencies

following completion of water reduction projects.

Energy Usage

The Operator has reported a total energy consumption (Gas & Electric) decrease in 2021 compared to 2020 and a reduction in energy consumption per tonne of production in 2021.

Performance Parameters

The Operator has reported all other performance parameters required by their environmental permit.

If you have any queries about this report, please contact the NRW officer named above.

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action only relating to the activity assessment
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description	Score
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property	60
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property	31
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property	4
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property	0.1

How we use assessment scores

The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator

Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

What are suspended scores?

In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.
