Dear Mr Williams

Compliance Assessment Report

- **the Environmental Permitting (England and Wales) Regulations 2007 (QP3937MD)**

When we visited your farm on *the 19th of June 2009* we noted that there was an area of non-compliance in relation to the above regulations that apply to your farm. I list them below together with the actions you need to take.

1. Breach of Condition Table 2.5

The drainage and Housing review had not been submitted by the required deadline of 31st of October 2008 as stipulated by the permit resulting in a breach of permit. However these have now been received, thank you.

Permit variation

As discussed on site you will need to vary your permit in order to accommodate the increase in poultry numbers due to the erection of two new sheds. Please find enclosed the standard variation forms together with the relevant guidance notes. I have also enclosed copies of the initial air emissions screening results which have highlighted the need for **further** screening to be undertaken. The air emission impact assessment should then be submitted with your EPR variation application.

Please contact me if you have any questions about this letter or the regulations.

Yours faithfully
