Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This is a regulator initiated variation to consolidate the permit with changes made to emission limits, monitoring and reporting as a result of improvement conditions being discharged as the site moves to definite closure. Some administrative numbering errors have also been amended, and amendments to conditions to reflect modern permit template.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
