Dear Mr. Cameron

RE: Withyhedge Materials Recycling Facility – acceptance of MRF Fines

I am writing with regards to your request to continue to accept MRF fines at Withyhedge MRF. Further to my emails dated 10th and 14th April 2015 you have now provided an amended risk assessment and provided details on how the storage area will be serviced by a sealed drainage system.

The risk assessment has identified and addressed the main risks of the activity and you have highlighted a temporary drainage solution for the yard. Please can you confirm that these works have been undertaken and that the drainage is now sealed. In addition, please can you also provide details on where you will dispose of any collected run-off.

From the information provided, I am content for you to continue to accept the fines in the short term and on the proviso that;

- It does not cause pollution to the environment, cause harm to human health or detriment to amenity;
- The waste is clearly segregated and clearly marked as waste designated for the landfill

However, this is an interim measure and you will need to submit a Permit Variation if you wish to continue to accept this waste long term. Therefore, you are required to cease this activity by 1st July 2015 unless it is otherwise agreed in writing with NRW; or a new permit authorising the new waste code and activity has been issued.

As always, if you have any queries, please do not hesitate to contact me.

Yours sincerely
