Dear Mr. & Mrs. Williams

**POLLUTION PREVENTION AND CONTROL (ENGLAND & WALES)
REGULATIONS 2000. TY NEWYDD FARM POULTRY UNIT**

Thank you for your time and co-operation during our visit to the above farm on 17th May 2012 to discuss your permit and carry out an inspection. As you are aware the Environment Agency has a duty to carry out inspections of sites regulated by such permits. I am pleased to say that all aspects of the farm were compliant with the conditions in the permit.

The four yearly reviews for energy, waste, raw materials and water were all looked at and met the requirements set out in the guidance contained in the "How to comply with your environmental permit" document.

During the inspection of the following issues were identified :

1.1 General Management

- In future the Pollution Inventory does not need to have the weights of fallen stock recorded in the waste transfer details section.

2.2 Site Plan

- This has been amended to reflect the changes to the drainage system caused by the installation of the heat exchanger

2.5 Improvement programme

- There are sections of concrete close to houses 3 and 4 where cracks are starting to appear, these will need some attention in the next 12 months. I note that you had flagged this for attention in your improvement programme. Please can you let me know what the likely time scale for completion of the work is.

Thank you again for your time. If you require any further information regarding this letter or anything we discussed during my visit then please do not hesitate to contact me on the number below.

Yours sincerely

CHRISTOPHER GARDENER
