Pic Up Spares Ltd

Permit number EPR/AP3498FR

Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This variation adds a decanning treatment of catalytic converters activity to the existing Tier 3 bespoke permit. The treatment activity results in producing metal casing which has refractory ceramic fibre (RCF) matting remaining within. Due to the waste potentially containing RCF matting this waste is classified as hazardous waste and given a waste code of 16 02 21*.

There will be no treatment of catalytic converters apart from the decanning process.

In addition, the varied and consolidated permit includes an improvement condition for the operator to submit a fire prevention and mitigation plan (condition 2.5, Schedule 1, Table S1.3). As per the operator's request, the permit has been updated to modern conditions.

No other changes are made to the permit.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit		
Description	Date	Comments
Licence issued (EAWML 34238)	04/08/04	Original waste management licence for end-of-life vehicle depollution and dismantling authorised treatment facility.
Modification issued	24/04/06	Recording of waste accepted and removed conditions – 6.1 ,6.2 included.
Variation issued EPR/AP3498FR/V003 (formerly EAWML 34238)	12/06/06	Table 2.1 (Specified end-of-life vehicle storage and treatment operations) replaced.
Application EPR/AP3498FR/V004 (variation and consolidation)	Duly made 28/04/17	Application to vary the permit to include decanning treatment activity for the catalytic converters and update the permit to modern conditions.
Variation determined EPR/AP3498FR	18/09/17	Varied and consolidated permit issued in modern condition format.

End of introductory note

Notice of variation and consolidation
