Dear Mr. Downing,

Pre-Application Heritage and Nature Conservation Screening Request

Pre-application permit number: PPN-00009

Customer: Paul Downing

**Site: Western Power Distribution, Fishguard Road Industrial Estate, Withybush,
Haverfordwest, Pembrokeshire SA62 4EQ**

Thank you for your request for a pre-application Heritage and Nature Conservation screening report for the above site. The results are enclosed.

I am also enclosing some information about how to assess the risks to any protected features near to your site prior to making an application for an environmental permit.

You must check the standard rules sets for the activities you are applying for, to satisfy yourself that you can meet the specific location criteria contained within each rule set. There are Tier 2 bespoke permit options for a limited range of standard rules sets, which can be used when a site cannot meet the location criteria of the rule set. These can be found in our charging scheme <http://naturalresources.wales/media/3557/environmental-permitting-charge-scheme-guidance-2015-16.pdf>. Please note, to qualify for a standard rule set or associated Tier 2 bespoke permit, you must be able to meet all other criteria in the rule set e.g. waste types/quantities, activities etc. Where a site cannot meet the location criteria and a Tier 2 bespoke option is not available, you need to apply for a Tier 3 bespoke permit.

In all cases, please speak to your local area office to obtain pre-application advice. If you do not yet have an officer's name to contact, please ring our Customer Care Centre on 0300 065 3000 for assistance. Please use the pre-application permit number (PPN) above when you communicate with us about this site and when you apply for a permit.

If you have any queries about the results of this screening, please contact me using my details below.

Yours sincerely,

**Ella Williams
Permitting Officer**

Protected species Present – Approx. 400m west of site Eel, Silver eel, Yellow Eel	Up to 500m	<u>Natural Resources Wales</u>
Protected Habitats Present Protect habitat immediately adjacent to northern boundary of site	500m	<u>Natural Resources Wales</u>

Where protected species are present, a licence may be required from Natural Resources Wales to handle the species or undertake the proposed works. Contact details are available in the Natural Resources Wales factsheet on Nature Conservation, Landscape and Heritage screening.

The relevant Local Records Centre and County Ecologist must be contacted for information on the features within local wildlife sites. A small administration charge may also be incurred for this service.

Information on the lead contacts and legislation behind the conservation interests listed above are available in the Natural Resources Wales factsheet on Nature Conservation, Landscape and Heritage screening.

Please note we have screened this application for protected sites for which we have information. It is however your responsibility to comply with all environmental and planning legislation, this information does not imply that no other checks or permissions will be required.

Please note, the screening report is valid for a period of 6 months. If you plan to submit your application more than 6 months after the screening report was generate generated, you must request that the screen is re-run. This will ensure that you have used the most current information on heritage and nature conservation interests in your application.

You can obtain pre-application support by contacting us on 0300 065 3000 (Mon-Fri, 8am - 6pm).
