Introductory note

This introductory note does not form a part of the permit

The main features of the permit are as follows.

This permit is for the recovery of mixed metals including End-of-Life Vehicle depollution. Wastes permitted include hazardous and non-hazardous wastes. Treatment of WEEE is not permitted and the storage of WEEE must meet the technical requirements of the WEEE Directive (2000/96/EC as amended 2003/108/EC) and Defra's 'Guidance on Best Available Treatment Recovery and Recycling Techniques (BATRT)' and treatment of Waste Electrical and Electronic Equipment (WEEE). The site is split into two where Phoenix Metals depollutes End-of-Life Vehicles and recovers ferrous metals and Colin Davies recovers non-ferrous metals. The total amount of waste that can be accepted at site must be less than 25,000 tonnes a year.

All activities shall be carried out on an impermeable surface with sealed drainage. The interceptor drains from site to surface water. There are no monitoring requirements.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.
